PRX-T[®] *lady*

The revolutionary program to rejuvenate and lighten external intimate parts

www.wiqo.com

FROM THE WORLDWIDE SUCCESS OF PRX-T₃₃

BIOREVITALISATION WITHOUT NEEDLES

Intrinsic ageing also occurs in **covered areas** and the menopause makes it suddenly appear worse. Today menopause is just an event in the midst of an active life, and not the end of it, as it once was. An **active life** includes all its aspects, including **sex life**.

PRX-T lady is the biorevitalisation treatment designed to improve elasticity and to give back to the **external intimate parts** the tone they lose with age.

Indicated for the treatment and prevention of epidermal lesions and to treat chrono-aging and hyperpigmentation of external intimate parts, armpits, areolae, and perianal area.

- Leaves the skin **toned** and **firm** again without damaging the epidermis
- **Lightens** hyperpigmented areas
- Instant, natural and long-lasting **improvement in appearance**

PRX-T[®] lady

BENEFITS

- **Well tolerated** treatment. The product is applied with a needleless syringe directly on the chosen area
- The treatment takes **10-15 minutes** to be applied
- **Immediate** return to work and social life
- **Safe and discreet**

INDICATIONS

- Treatment of chrono-aging and of hyperpigmentation of the external genital area, of the perianal area, armpits and areolae.

RESULTS

- **Treats** and **prevents** epidermal lesions
- Skin looks more **toned** and **compact**
- **Lightens** hyperpigmented areas
- Instant and long-lasting **improvement in appearance**

TREATMENT SESSIONS

The number of sessions required will vary according to the desired results: **3 to 5 sessions** are usually sufficient to treat and prevent epidermal lesions, give back firmness and restore the natural, lighter colour of the skin.

1. BIOREVITALISATION

at the clinic

The physician applies **PRX-T[®] lady** and stimulates the natural regeneration of the skin.

2. PROTECTION

at the clinic

To restore the natural balance of the skin and to deeply hydrate the skin of the area being treated, the physician will apply the **WiQo Restoring Cream**, specifically formulated for the skin of the external intimate parts.

3. COMPLETION

at home

To complete and maintain the lightening effect, use the **WiQo Lightening Serum for external delicate areas**, which maximizes the effect by improving skin pigmentation when there are hyperchromic areas.
