

NEAUVIA

A woman with blonde hair, wearing a dark, pleated, long-sleeved dress with a belt, stands in the center of the frame. She is looking directly at the camera. The background is a vibrant red wall. On either side of the woman are two sinks mounted on stone pedestals. The lighting is dramatic, with strong highlights and shadows, creating a sophisticated and modern aesthetic.

PORTFOLIO OVERVIEW

A woman with dark curly hair, wearing a vibrant red button-down shirt, is sitting cross-legged on a bed. She is looking down at a silver laptop held in her lap. The room is dimly lit, with a warm light source from the left creating a soft glow on her face and the bed. The background features a patterned headboard and a lamp.

Rethinking **MEDICAL** *aesthetics*

Neauvia aims to inspire and shape the world of aesthetic medicine with a disruptive energy, opening up new lifestyles and creating a community that embraces our new conception of aesthetics.

Created in 2012, distributed in more than 80 countries worldwide and today, a high-growth multinational corporation with production sites and subsidiaries in Italy, Switzerland, France, Spain, Poland, Germany, UK and US, Neauvia provides healthcare practitioners and patients clinically proven combined solutions.

Thanks to a comprehensive range of high-end technologies working in synergy, we deliver safe and more effective results for facial, body and intimate rejuvenation. Rethinking medical aesthetics as premium experiences, by fully integrating this approach into a modern and healthy lifestyle, Neauvia empowers all beauty lovers.

The synergistic approach

Age-related anatomical changes are most effectively managed through the combination of science and technology. To achieve this goal, Neauvia research designed **SMART COMBINATION THERAPY** that combines different restorative therapies and grants clinically proven superior results.^{1,2}

NEAUVIA Devices

The best results with maximum safety

Neauvia provides a range of energy-based devices for the aesthetic, gynecological and surgical markets.

Neauvia devices are characterized by advanced electromedical engineering.

They are based on specifically designed and integrated technology, allowing optimal results in combination with Neauvia's PEG HA fillers and cosmeceuticals and ensuring maximum patient safety.^{1,2}

Focus on Sectum

Multi-purpose RF Solution

Sectum

The shape of beauty

SECTUM HARNESS THE POWER OF RADIOFREQUENCY

How it works'

Radiofrequency energy consists of alternating wavelength current that is delivered by one or more specially designed electrodes. As the energy travels across the tissue, the polarity or electrical charge of the skin tissue is changed. The friction of the movement of the energy current creates heat in the skin.

RF energy is emitted from one electrode and travels the path of least resistance or impedance in the skin and/or body, to a second electrode.

Sectum: IIb class Medical Device regulated health product which bears, under this regulation, the CE mark. Manufacturer: B&K Domaniewska 37, Warsaw, Poland. Please carefully read the instructions in the leaflet. The use of these products requires the intervention of a healthcare professional.
