

Z7 Introducing Z7 A Zhaga Sensor Serves for Standalone and Networked Controls

IR-TEC's Z7 series is an IP-66 Zhaga Book 18 compliant multi-sensor designed to work with DALI or D4i certified drivers. Through simple twist-to-lock connection and intuitive remote programmer setting, the Z7 sensors can easily enable OEM luminaires with occupancy and daylight sensing control functionalities in standalone or wireless network basis.

Each Z7 sensor is packed with multiple sensing and control functionalities for achieving the highest energy savings performance and state-of-the-art wireless mesh networking capability to enable smart lighting control with unequalled simplicity.

For more details about Z7 series sensor, please visit www.irtec.com or contact support@irtec.com

Features:

- Support 4-pin Zhaga Book 18 Edition 2 receptacle
- Designed to be mounted on bottom of luminaire
- IP66 and IK08 protections for harsh environment
- Omni-directional quad element digital PIR sensor
- Available for standalone or wireless networked control
- Direct control DALI driver with AUX or bus power
- Multiple sensing control schemes programmable
- Multi-level high/low StepDIM or SmartDIM control
- Multiple lens options available for different coverage
- Sensor setting via 2-way IR handheld programmer

Applications:

- Parking Lot
- Plaza
- Park/Playground
- Canopy
- Pedestrian Walkway
- Warehouse
