Individually tested

The handle/blade system - Kraftform Kompakt VDE

Each Kraftform Kompakt VDE set has been tested individually at 10,000 volts, in accordance with IEC 60900. This ten-times-higher testing load guarantees safe working at their maximum permitted load of 1,000 volts.

Quick torque setting

Quick setting of the selectable tightening torque values.

Excess-load signal

Distinctly audible and noticeable excess-load signal when the pre-set torque is reached.

Safe torque transfer

The slip-over torque mechanism for clockwise/counterclockwise torque operation prevents unintentional application of excessive torque.

Handle/interchangeable blade system

The handle/interchangeable blade system allows rapid exchange of the blades required for a wide range of applications.

VDE interchangeable blade with reduced shaft diameter

Reduced blade diameter with integrated protective insulation, allows sunken screws and spring elements to be accessed and actuated, individually tested as per IEC 60900.

PlusMinus screwdrivers

For the use in terminal blocks, control cabinets, switches, relays, sockets etc.
