

Charge Amps Dawn Professional

An investment that delivers – day after day

- Always connected with free built-in 4G and WiFi, forever.
- 5-year warranty
- Quick installation with click mounting and robust terminal block
- Cost-effective and scalable solution – install an unlimited number of chargers and expand with ease
- Maximum power utilization with market-leading load balancing and phase balancing
- Future-proof with MID certification, ISO15118 support, and OTA updates
- Smart management of users, costs, and reporting via RFID and IMD

Charge Amps Dawn Professional

Everything you need – already built in
No external meter. No external connection.
No compromises.

Charge Amps Dawn Professional
comes with a built-in MID-certified energy meter,
full connectivity (4G, WiFi, LAN and Bluetooth).

- Future-proof with Plug & Charge support
- Connectivity always included at no extra cost

With Plug & Charge, the car is automatically identified when connected – no need for cards, apps, or extra steps. This makes charging simpler, safer, and more user-friendly – fully prepared for the new ISO 15118 standard.

Charge Amps Dawn Professional is also future-proof. Thanks to continuous cloud updates, its features evolve over time, ensuring your charging solution always keeps pace with new technologies and upcoming requirements.

For your peace of mind, it always comes with a 5-year warranty.

Built for simplicity – designed for the future

Install with ease. Expand effortlessly. Charge Amps Dawn Professional is ready for daisy-chaining straight out of the box, with a pre-mounted circuit breaker, terminal block, and LAN module. Perfect for building a complete charging system – without the hassle.

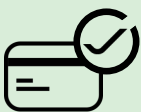

Smarter charging, lower costs

With our dynamic load balancing and real-time control via Charge Amps Cloud, every car always receives optimal charging – without tripping the main fuse. You avoid both power peaks and costly grid upgrades, even when many vehicles are charging at the same time.

Our award-winning solution automatically balances the power between chargers and the household's overall electricity consumption. The result is safe, efficient, and simple charging – Finalist at the eMobility Innovation Awards 2024 – where our smart charging technology was recognized as one of the industry's most innovative solutions.

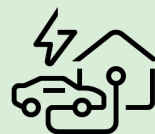

A scalable solution that grows with your needs

Payment solutions for smooth billing, integrated with Monta and EasyPark, among others

Individual metering and billing (IMD) is easily managed with Charge Amps

Innovative energy optimization with load balancing Charge Amps Amp Guard

Green Charging optimizes EV charging in combination with solar panels

Full control – for both users and administrators

With Charge Amps Dawn Professional, you gain full transparency over energy consumption. Users can easily track their charging costs, while administrators get powerful tools for reports, statistics, and billing.

All data is securely stored in the cloud, making it always available for follow-up, analysis, and optimization – whether it's for a single charger or a large, complex installation.

This way, you get total control, smooth management, and a solution that grows with your needs.
