STANDARD DOSE JUICE

The most impressive little giant: the lowest price per litre for juice on the market.

Up to 150 litres of juice from a small three-litre canister. Dilution ratio: 1 + 49

The dispenser pump always gives the same optimal amount of concentrate: one press is enough for a 1.5-litre jug. The juice tastes perfect – not too strong or bland.

Lightweight, ergonomic and ecological packaging.

Sugar-free, sweetened with sucralose and acesulfame K.

One standard dose canister provides juice for ten 15-litre dispensers. This is equal to four traditional 10-litre canisters of mixed fruit and berry juice concentrate.
