Dugga Digital Assessment
– born out of scientific research

digital assessment
dugga

Stand alone or integrated with Teams, Office 365 and using School Data Sync

Dugga is a digital assessment platform for all levels of education. With many different question types, Dugga provides a pedagogical platform for teachers to assess knowledge in a flexible and secure way. Teachers can create & perform all types of tests, assignments and exams all in one place! Students can take tests, write and hand in assignments within a familiar and secure environment.

"It is just fantastic to get Dugga easily accessible in Teams with automatic student account management through School Data Sync. Dugga's integration with Teams redefines the entire knowledge assessment process making our school truly digitalized. Instead of dreading exams we are now looking forward to them."
– Patrick Vestberg, Dean, Stockholm Science & Innovation School

Why customers use dugga:
- Effective: increase learning outcomes, automated marking and grading.
- Flexible: integrated with Office 365 or Teams + Dugga's Teams App
- Safe & secure system
- Easy-to-use: intuitive, familiar environment, SSO
- Many different question types
- Research-based innovation created by pedagogical experts

Built-in lockdown, auto-scoring, auto-grading, plagiarism analysis, text-to-speech. Measurable results. Integrated with Teams/O365 or use Dugga API for integration.

Dugga is suitable for all types and levels of education. The system is platform and operating system independent and can be used with PC Windows, Mac OSX, iPad IOS and Chromebook – Chrome OS.
