

FOR IMMEDIATE RELEASE

Power Technologies® Launches PT-Pro-Series Locker™ with Symphoni iOS, Revolutionizing Shared Device Management with PiLOT Break-Fix.

Temecula, CA – 1/20/25 – Power Technologies today announced the launch of the PT-Pro-Series Locker™, a smart locker solution designed to revolutionize shared device management. The PT-Pro-Series Locker™ will be unveiled at the BETT education conference in London January 22nd through the 24th at booth NH20 and will be available next at Didacta in Germany, February 11th-15th. NAM first showing will be at HIMSS Healthcare Technology conference in Las Vegas on March 3rd - 6th booth 4958.

Featuring intuitive, iOS-based Symphoni software, the PT-Pro-Series Locker™ empowers organizations to streamline workflows and significantly reduce administrative burden. Symphoni includes PiLOT Break-Fix, allowing proactive management of device deployment and exchange, intuitive workflows, detailed reporting and enhanced communication minimizing downtime and maximizing productivity.

Managing shared devices like laptops, tablets, smart phones, mobile computers and handheld scanners presents significant challenges for many organizations. Lost or misplaced devices, dead batteries, and inefficient check-in/check-out procedures lead to wasted time, reduced productivity, and increased costs. The PT-Pro-Series Locker™ addresses these pain points with a suite of innovative features:

- **Unified Device Management Solution with PiLOT Break-Fix:** Symphoni is more than just software; it allows for visibility of locker activity enterprise wide via centralized dashboard. Integrated into Symphoni is PiLOT Break-Fix, a system for rapid issue resolution, ensures seamless shared device management.
- **Intuitive Touchscreen Interface:** Each locker unit features a user-friendly touchscreen interface for quick and easy self-service device check-in/check-out, eliminating manual logs and minimizing administrative overhead.
- **Integrated Charging Capabilities:** Every locker bay is equipped with multiple charging ports, ensuring devices are always charged and ready for use, maximizing uptime and user productivity.
- **Modular and Adaptable:** The PT-Pro-Series Locker™ offers a modular design, allowing organizations to choose the configuration that best suits their needs.
- **Reduce Shrinkage:** Secure locker bays protect valuable devices from theft, damage, and unauthorized access, extending the device lifecycle, minimizing replacement costs and ensuring device integrity.

“In today’s increasingly mobile world, it is crucial for organizational success to implement strategies to simplify shared device management and extend device lifecycles’ says David Burns, CEO. ‘The PT-Pro-Series Locker™ empowers IT departments with the tools they need to streamline operations, reduce costs, and ensure seamless device deployment and exchange, with the added advantage of rapid issue resolution through PiLOT Break-Fix.’”

The PT-Pro-Series Locker™ powered by Symphoni with PiLOT Break-Fix is ideal for:

- Manufacturing and Warehouse Distribution Operations deploying tablets, mobile computers and handheld scanners.
- Schools and universities managing classroom and student devices.
- Hospitals and healthcare facilities managing shared mobile devices and 24/7 operations.
- Businesses and organizations managing shared employee devices, company devices and personal devices.
- Libraries and public spaces offering device lending programs.
