

WOOD CHIPPER GTS1300

GTS1300

GTM Professional presents the new GTS1300 wood chipper, a powerful machine for professional use in the field of tree maintenance, groundscape and forestry.

With the new GTS1300 wood chipper, you can shred fresh cut wood with a maximum diameter of 100 mm and dry wood of 80 mm. This unique performance is realized by PRO blades (special alloy) and the rotor system. Furthermore, the durable PRO blades last twice as long.

The GTS1300 wood chipper is lightweight and perfectly balanced so that one person can operate and move this machine (possibly with the optional tow bar for ride-on mowers). Because of the compact dimensions the GTS1300 fits any trailer, van and even through garden gates.

TECHNICAL DATA

Chipping method	Drum chipper
Blade type	Double grinded blades (2x)
Counter blade	Yes
Rotation speed motor (RPM)	3600
Capacity	Max. Ø 10 cm
Height input	103 cm
Dimensions input	35 x 50 cm
Height output	162 cm
Output direction	Side
Deflector	85° adjustable
Wheels	Ø 39 cm
Safety	Rotor blocking system
	Panic bar
Dimensions complete machine	155 x 77 x 162 cm (L x W x H)
Sound level (LWA)	120 dB (A)
