

ATELIER PIERRE
DENTELLES

your daily dose of **conviviality**

Dentelles

Dentelles is developed from an intense desire to be together again with friends and family. More than ever we realise how valuable this is. A stylish getting together, can also be organised in an affordable way. You can start to create the perfect atmosphere with the warm light of Dentelles.

Dentelles refers to the paper doilies used by Lieven and Jenny Vanhalst in the Pastry Shop in the 70's. If you pile up several doilies, you get the shape of this collection. And just nice to know: the word contains 'elles', which refers to 'les filles' - the girls - in French. Indeed, Dentelles is designed by two young ladies, Paulien and Kaat.

Dentelles stands out in any interior or exterior and is very versatile. The objects are wireless and therefore easy to move. Moreover, the lamps can simply be dimmed by tapping. The items are 100% recyclable and non-breakable.
