Fondant

Paulien and Louise

Set the mood with Fondant

This unique Fondant collection is designed to bring people together, combining functionality of the serving trays with an intimate glow of light. The gentle curves of the lamp and warm wood tones of the trays are subtly alluding to melted chocolate. Together, they create an inviting atmosphere, bringing conviviality to both indoor & outdoor settings.

Fondant is the perfect result of a collab between designers Paulien and Louise. Paulien designed the elegant table lamps, while Louise added the touch of functionality with matching serving trays. Made in Europe from 100% FSC wood, these trays are perfect for serving shared dishes and treats. Pair the mood lights, designed in recycled PE, with the trays or switch them up with the bowl for added versatility. With their tap-to-dim function offering 4 dim levels, they effortlessly set the mood with adjustable brightness.

A top-down photograph showing several wooden trays of different shapes and sizes, some light-colored and some dark, arranged on a light-colored, textured woven rug. A single light-colored ceramic egg with concentric ring patterns is placed on one of the dark trays. The text "combine the mood lights with the wooden trays" is overlaid on the right side of the image.
