For healthy indoor air in offices, healthcare, and public spaces

Powerful, quiet, flexible with a small footprint, FS 30 is ideal for offices, schools, hotels, and care facilities in need of healthy air and quietness. FS 30 uses multi-stage mechanical filtration and monitored airflow to guarantee efficient air cleaning over time. It captures at least 99.995% of the most elusive particles like viruses and bacteria with HEPA 14 filter. For odors and gases, carbon filter is available. The unit works independently of the ventilation system, uses the standard power socket, and can be easily relocated. Developed in collaboration with Karolinska University Hospital.

The QleanAir Difference

With a significant impact on health, performance, and quality there are few things as important as clean air. We deliver clean air as a service with hassle-free installation, maintenance, upgrades and filter changes. With our unique Lifetime Performance Guarantee, we can guarantee your air quality over time.
