

Your advantages with a weighing dispensing cabinet and Schindler's tool management

Below are the benefits of a weighing dispenser in conjunction with the S-Anywhere tool management system to help you make a decision.

- ✚ Manual entry and exit processes are no longer necessary. Withdrawals and returns are automatically registered
- ✚ Person-specific assignment of goods withdrawals
- ✚ Automatic inventory at any time
- ✚ Product 24/7/365 available
- ✚ Access can be restricted to individual employees
- ✚ No loss of productivity or delays due to missing parts, the tool management automatically triggers a notification/order if necessary (reaching the minimum stock)
- ✚ Items can be easily removed and refilled
- ✚ Reduces inventory by up to 50% compared to Kanban shelves
- ✚ Can be used both as a goods issue machine and as a tool machine
- ✚ The system solution can also be expanded to include manual dispensing (stationary and mobile)
- ✚ An additional expansion with a wide variety of vending machines is possible, such as:
 - Drawer vending machines
 - Key machines (vehicle, real estate keys)
 - Vertical lift systems (Hänel, Kardex)
- ✚ By using a common database, all system components are intelligently networked. This maximizes synergies and significantly increases productivity.

Let's plan and implement YOUR system solution together!

Invest in the future of your materials management. Our vending machine optimizes your processes, reduces errors and ensures higher productivity.
