

## Our Commitment to Climate and Environmental Protection

Through its specialized service portfolio, OptiOil demonstrates a clear ecological focus — actively contributing to climate and environmental protection.

In a time of global efforts toward environmental sustainability, every liter of properly maintained oil makes a difference. Well-maintained and professionally purified oil does not need to be replaced — and therefore does not need to be disposed of. This conserves global crude oil resources and significantly reduces waste oil volumes.

By extending oil life through advanced filtration, both procurement and disposal costs are reduced — while also relieving the environmental burden. With its range of services, OptiOil plays a direct role in lowering emissions and preserving resources — because optimized oil maintenance can lead to a substantial reduction in CO<sub>2</sub> emissions.

## Our Service Portfolio

OptiOil GmbH, a medium-sized enterprise based in Cloppenburg, stands as a trusted and highly competent partner in all aspects of lubricant maintenance. With expertise spanning oil analysis, conditioning, purification, dehydration, and state-of-the-art filtration technology, OptiOil provides comprehensive and tailored solutions for all fluid management requirements.

In addition to reliability, customer orientation, and uncompromising quality, OptiOil places a strong emphasis on maximizing the availability and operational efficiency of your equipment. At the same time, OptiOil's service portfolio actively supports environmental protection by reducing resource consumption, minimizing waste, and promoting sustainable fluid management practices.

- ▶ Oil Analysis
- ▶ Oil Dehydration
- ▶ Varnish Removal Filtration
- ▶ Oil Filtration
- ▶ Tank Cleaning
- ▶ Turnaround Support
- ▶ Filtration Technology
- ▶ Online-Monitoring
- ▶ Carbon Accounting

## Long-Term Rental of Filtration Units

By employing advanced filtration and dehydration technologies, the beneficial properties of modern lubricants are effectively preserved. This not only reduces environmental impact and supports the reduction of CO<sub>2</sub> emissions, but also conserves valuable resources and significantly lowers production costs. To support proactive lubricant maintenance, we offer long-term rental solutions for high-performance filtration units tailored to your oil system.

### Your Benefits with Long-Term Rental Solutions:

- ▶ No high upfront investment costs
- ▶ Continuous, long-term oil maintenance
- ▶ Resource-efficient and sustainable
- ▶ Includes regular sampling and oil analysis
- ▶ Includes scheduled maintenance service

## Certifications

OptiOil is fully committed to implementing and maintaining effective safety, environmental, and quality management systems — ensuring maximum operational reliability and compliance for our partners. Continuous monitoring by accredited certification bodies underlines this commitment.

- ▶ DIN EN ISO 9001:2015 – Certified Quality Management System
- ▶ SCC\* – Safety Certificate for Contractors (Occupational Safety & Health Standard)
- ▶ Certified Specialist Company in accordance with the German Ordinance on Facilities for Handling Substances Hazardous to Water (AwSV)
