

High-Performance Rust Remover

Chemical preparation for extremely fast rust loosening.

Characteristics

- Dissolves rust extremely quickly due to its excellent penetrating properties. It penetrates the finest pores, even in screws and tools that have not been maintained for years and have rusted.
- Effectively removes dirt crusts, oil residues, resinification and adhesive residues from metal parts, cleans threads and makes work easier and effortless with short working times.
- Silicone-free.

Application

Spray Rasant rust remover onto the rusted parts. During the dissolving process, make sure that you spray again immediately after the first thread.

Advice

- Allow to act only briefly on painted surfaces or rubber.
- Please observe the safety text on the aerosol can and the information in the current safety data sheet.

Technical Data

- Appearance: slightly yellow-brown
- Odor: product-specific
- Density at 20°C: 0.827 - 0.857 g/cm³

In view of the wide range of possible applications, working methods and material properties, this information sheet can only provide non-binding advice based on our experience. It cannot be used as a basis for determining the results to be achieved during application. For special applications, a preliminary test for material compatibility must always be carried out. No liability can be accepted for improper, professional application and the resulting damage. Official - in particular local - regulations must be observed. We reserve the right to make technical changes to our products. For further information, please contact our application consultants.
