

Super Multifunctional Spray

The Original

Characteristics

- Acts as a rust remover, contact spray, corrosion protection and metal care product
- Has very good lubricating properties, even at high pressure
- High moisture displacement and good corrosion protection
- Silicone-free, free from solids and does not resinify

Application

Spray Super onto the parts to be lubricated and allow to evaporate briefly. Then carefully loosen rusted connections. Repeat application if necessary for heavily rusted connections.

Advice

- Please observe the safety text on the aerosol can and the information in the current safety data sheet.

Technical Data

- Appearance: yellowish-brown liquid
- Odor: specific
- Density at 20°C: 0.827 - 0.847 g/cm³
- Corrosion protection (DIN EN ISO 9227): <5% corrosion after 19 h
- VKA load capacity (DIN 51350): 2800 N
- Application temperature range: -30 °C to 150 °C

In view of the wide range of possible applications, working methods and material properties, this information sheet can only provide non-binding advice based on our experience. It cannot be used as a basis for determining the results to be achieved during application. For special applications, a preliminary test for material compatibility must always be carried out. No liability can be accepted for improper, professional application and the resulting damage. Official - in particular local - regulations must be observed. We reserve the right to make technical changes to our products. For further information, please contact our application consultants.
