# **MORE HEIGHT. MORE CONVENIENCE. LESS SET-UP TIME.**

ZAP work platforms from ZARGES

# ZAP IS FOR EVERYONE – AND FOR EVERY WORK AREA

## Safer than stepladders and more flexible than powered access

Working at height is essential in many industries, and the right equipment is crucial for safety and efficiency. ZAP work platforms are ideal for working at medium heights, providing safety and freedom of movement where the high reach or load capacity

of powered access is not required. As early as 2007, we were one of the first manufacturers to develop work platforms; we were meeting the industry's increasing safety requirements even before the EN 131-7 was introduced.

## ZAP work platforms are the perfect solution

**Wide work platforms are suitable for longer periods of work at height** and offer more safety and comfort and full freedom of movement in all directions, for example during installation, maintenance, or quality control work.

**The sturdy platform with safety guardrails** allows working with both hands, ensuring 360 degree protection and freedom of movement. Many ZAP work platforms also have practical tool trays that greatly reduce the need to frequently ascend and descend the platform.

## WHAT SETS OUR ZAP WORK PLATFORMS APART

- Minimum dimensions of platform 400 × 400 mm
- Minimum 3-sided guardrail
- Guardrail height is at least 1,000 mm
- Foldable/collapsible without the use of tools
- Min. EN 131 – in some cases part 7

### Restricted space and frequent relocation

In narrow aisles or between machines, ZAP work platforms are easier to set up and relocate than apowered access.

1.70	3.18	3.70	2.74	0.67	7	27.4	41444

# ZAP SAFEMASTER PLUS S

## The robust variant for convenient close-to-wall order picking work

The wide platform ladder features long handrails and a spacious platform. These make it very easy to repeatedly ascend and descend while frequently changing position during picking. The close-to-wall

design of the ladder minimises the reach length. It can be relocated quickly and easily thanks to the stable chassis beam and lockable wheel set.

Platform height m	Working height m	Height including guardrails m	Width of chassis beams m	Width of horizontal stabiliser bar m	Number of steps incl. platform	Weight kg	Order no.

# ZAP NEO S

## The lightest platform ladder in the range: For frequent relocation, for interior trades, servicing and repair

The ZAP Neo S is the ideal, super-light ZAP-family entry-level ladder: light, easy to use and compact with folding handrails. Perfect for long periods working at height. Particularly for trades that need both hands free to work.

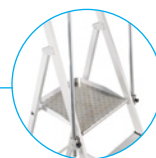

**WORKING WITH BOTH HANDS FREE**  
thanks to 3-sided safety guardrails

**ERGONOMIC ASCENT AND DESCENT**  
Easy and safe on deep treads with safe non-slip ribbing

**EASY HANDLING**  
Foldable handrails and low weight facilitate rapid relocation

**COMFORTABLE STANDING**  
large aluminium work platform

**SAFE STANDING**  
due to rigid connecting braces
