

EFA-SmartConnect[®]: intelligent networking for your doors

Introducing another first from EFAFLEX, the EFA-SmartConnect[®] the simple smart phone app that allows you to monitor the real-time status of your EFAFLEX doors at a glance. This clever piece of software can even assist with maintenance predictions, reducing the risk and effects of costly downtime.

Should a malfunction occur, the app can be used to relay a simple notification to EFAFLEX. So just one click and any problem is in hand – streamlining the service process and reducing downtime, with state-of-the-art technology ensuring vital data security.

BENEFITS

- Your EFAFLEX doors visible at a glance via your smartphone
- Simple, predictive maintenance planning and repairs
- Fast diagnosis using digital service notifications
- Prevents downtime and unnecessary costs
- Easy to retrofit (EFA-TRONIC[®] required)
- Basic door parameters can be set using the app

DATA SECURITY

- No registration necessary
- Can be installed using most existing WLAN networks
- Data sovereignty remains with the user
- Independent of mobile networks
- Modern security standards such as: WPA2, PSK, AES etc.
- Additional proprietary encryption of TCP and UDP packages
