

New release: The **miscea CLASSIC**[®]

Press release 06-01-2011 Nieuwkoop

Compared to the previous model, installation, maintenance and serviceability of the system have been greatly enhanced. The new **miscea CLASSIC**[®] has many exciting new features, such as the handy miscea remote control that allows you to effortlessly configure a number of settings of your miscea to your own personal preferences. This means, adjusting the amount of soap, disinfectant or the starting water temperature of your **miscea CLASSIC**[®] has never been faster or easier!

What's new?

Handy remote control

Adjusting individual settings of the **miscea CLASSIC**[®] is easy and can be done any time by using the miscea remote control. The handy remote control allows you to easily adjust the amount of soap and disinfectant the system dispenses to your personal needs. As well as being able to alter the starting water temperature and the water shot-off delay to your satisfaction, you can also switch the heartbeat, beep tones or the entire system 'on' and 'off' with just one handy remote control.

Quick Release Handles

The newly developed quick release handles for the refill pouches allows them to be changed even easier and faster than before!

Separate water box and soap box enables more flexible assembling – taking up even less space under your sink!

The practical "click on" system of the soap box and the water box facilitates easy installation, minimum maintenance and speedy service work!

Stronger pumps

With thicker liquid refill products, the pumping time no longer needs to be adjusted! For questions about where to buy our products or questions concerning the use or installation, please contact your local miscea sales office here.

For more information, please contact miscea B.V. on telephone +31 (0) 172 76 91 39 or via email at info@miscea.com.
