COMPOSITION

Enamel/Dentin : UDMA, PMMA, Micro fumed silica, others
Base : PMMA, others

INDICATIONS FOR USE

Used as denture teeth to produce partial or full dentures

PRECAUTIONS AND WARNINGS

1. If any inflammation or other allergic reactions occur on either the patient or operator, immediately discontinue use and seek medical advice.
2. Wear protective glasses etc. while cutting and polishing this product to avoid damages to eyes.
3. Use a dust extractor, dust protective mask etc. while cutting or polishing this product, to avoid harmful effects of dust on the human body.
4. Do not use this product for any purposes other than specifically outlined in these instructions for use.
5. This product is intended for use by dental professionals only.

DIRECTIONS FOR USE

Produce full or partial dentures following the conventional method.

- Carefully contour and polish this product since its enamel and dentin layers are hard and highly wear resistant.
- Do not use strong alkaline gypsum dissolving agent (pH 10 or over) to avoid discoloration.
- Do not expose to fire when fabricating wax denture.
- Give mechanical retention when using thermoplastic denture base resins. Veracia does not bond to thermoplastic denture base resins.
- Give the following general instructions to patient:
 - a. Keep the denture clean. Gently remove food debris with a soft denture brush after eating. Using denture cleanser is more effective.
 - b. When the denture gets dirty or accumulates plaque, clean by using a denture brush and dentifrice.

STORAGE

Avoid high temperature and high humidity. Keep away from direct sunlight.

READ CAREFULLY BEFORE USE
