

EN The PRIMODENT teeth collection comprises 45 sets of teeth manufactured in a technological process which guarantees excellent mechanical properties and the colour resistance of the teeth. The collection consists of 27 sets of upper anterior, 10 sets of lower anterior, and 8 sets of posterior teeth. In terms of their mould the upper anterior teeth are divided into a group of triangular, a group of oval, and a group of square teeth. The available wide range of moulds meets even the most demanding criteria. The endosed Table facilitates the selection of compatible anterior and posterior teeth, the shade guides Primodent and Primodent - V, however, the choice of adequate shades.
