

GANVAC

**BETTER ENVIRONMENT
BETTER TOMORROW**

**VAPOUR RECOVERY UNIT FOR
LOADING GANTRY**

GanVAC

VAPOUR CONTROL SOLUTION FOR YOU

WHAT IS GANVAC ?

CADABCO introduces a new, simple and innovative Vapour Recovery System (GANVAC) to the market, based on adsorption of activated carbon and regeneration by vacuum. It recovers vapours straight from your loading gantry. During truck loading, the vapour return arm is directly connected to GANVAC and the recovered product is sent back to the truck.

WHAT IS OUR VISSION ?

We convert waste gas emissions into Profit, keeping you in Compliance, while creating cleaner Environment. Through good practices and gained knowledge we help our partners to improve their business environmental performance.

WHY US ?

The team of CADABCO is motivated and passionate one. We have over 15 years of experience in the field of the Hydrocarbon Vapour Recovery. We provide a scalable and feasible solution bringing economic benefit for the petrochemical industry, thus preserving the ecology and making the working environment greener and cleaner. We believe that with common efforts can achieve our goals of zero emissions in the atmosphere from the gasoline distribution process.

WHY WE NEED VAPOUR RECOVERY ?

The recovery of Volatile Organic Compounds (VOCs) is becoming an increasingly pressing topic. Now more than ever, the impact on the environment is under scrutiny. The emitted vapours contain VOCs along with benzene, xylene and toluene. Released into the air and heated up by the sun the VOCs help to increase the pollution in the atmosphere (known as smog), which can affect human health. The vapour recovery can provide significant environmental and economic advantages for all related parties.

GANVAC, IT'S AS SIMPLE AS THAT !

- ✓ No Need Of : Vapour header, Connection to storage tank, Remote control cabinet.
- ✓ Detonation arrester and vapour arm included in the unit.
- ✓ Request only power supply and instrument air.
- ✓ Measurable return on investment.
- ✓ Each gantry is independent.

**WE ARE MOVING
TOWARDS GREEN
TO KEEP THE
PLANET CLEAN**
