

TELESCOPIC WHEEL LOADER | TM110 AGRI

STAGE V

MAX ENGINE POWER
36kW (48hp)

OPERATING WEIGHT
3,295kg

LIFT CAPACITY
1,100kg

NEW BEGINNING FOR POWER

A groundbreaking addition to our telescopic wheel loader range, the JCB TM110 redefines expectations for compact machines. It offers a 36kW (48hp) engine providing you with increased performance at low engine speed.

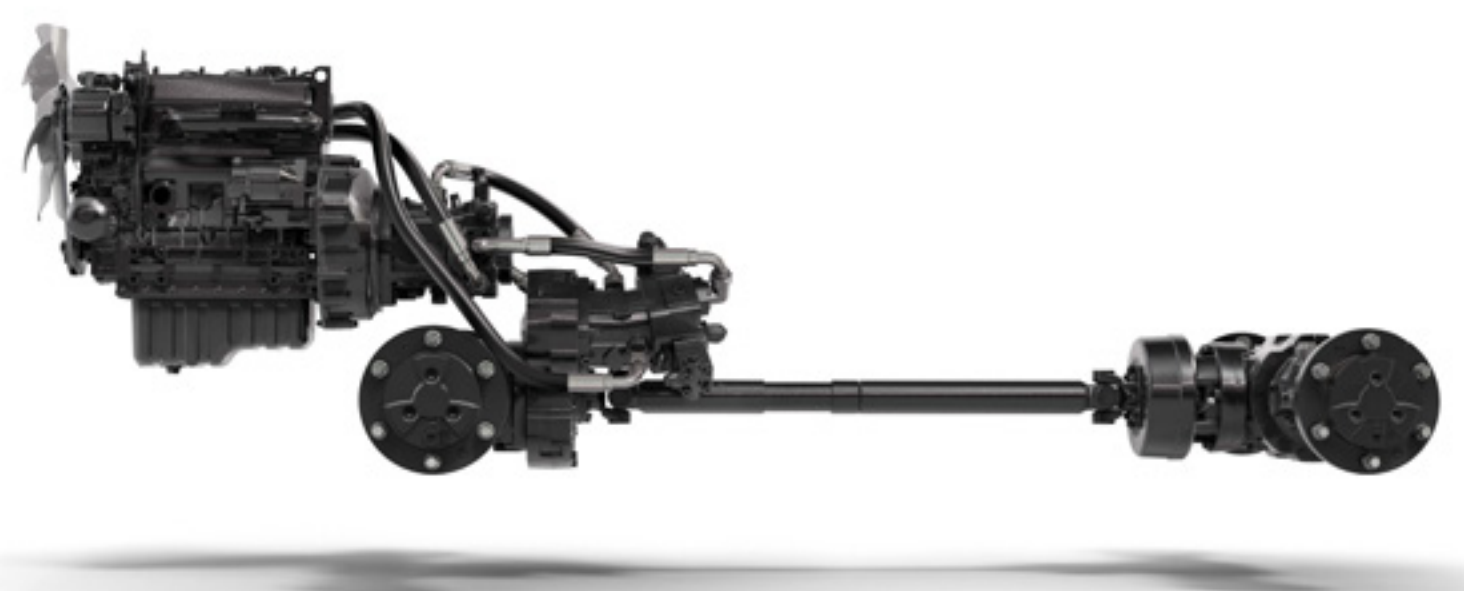

EASY OPERATION

The 36kW diesel engine with a DPF particulates filter meets Stage V emission regulations without the added cost and complexity of AdBlue diesel exhaust treatment (DEF).

NEW BEGINNING FOR PERFORMANCE

The JCB TM110 has an outstanding lift capacity with a payload of 1,100 kg. Combined with a lift height of 3.5m, this allows for ultimate performance in a compact frame.

DRIVETRAIN PERFORMANCE

Our two-speed, hydrostatic transmission ensures fine controllability in tight spaces, whilst providing a travel speed of up to 30kph.

NEW BEGINNING FOR COMFORT

The TM110 offers comfort in a compact package. The cab is fitted with a simple, yet intuitive control layout and the central driving position provides superb visibility.

A COMFORTABLE OPERATOR

The TM110 benefits from a comfortable and spacious cab along with joystick loader controls. The operating position is designed for optimum all-round visibility, unhindered by exhausts and air filters.

NEW BEGINNING FOR DESIGN

Our most innovative compact design, the TM110 performs in the tightest of environments, meeting high standards of stability and comfort when completing tasks in confined areas.

DESIGNED AROUND YOU

Heavy duty articulated steering enhances manoeuvrability in tight spaces, whilst offering a side-shift capability. The oscillating centre pivot point maintains even weight distribution.

NEW BEGINNING FOR SAFETY

The JCB TM110 is designed for easy servicing, simplified cleaning and a virtually maintenance-free operation. The advanced EN15000 load motion control allows for secure lifting at height.

SAFETY FIRST

The central driving position combined with a low boom pivot point gives all-round excellent visibility for the operator.

STANDARD FEATURES

- Stage V compliant engine
 - Tilting steering column
 - 2-range hydrostatic transmission
 - Fully glazed cab
- Joystick loader control
 - Single auxiliary service
 - Hydraulic quickhitch pin locking
