

KEYper GO mobile administration

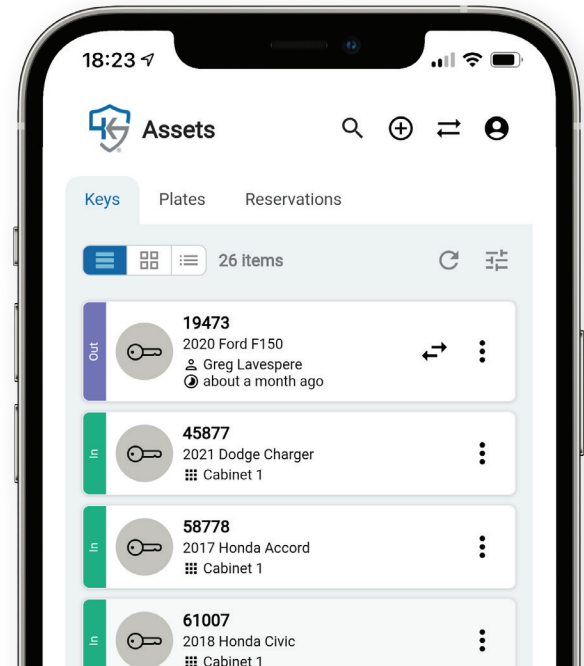

Centrally store and protect your keys, manage them from anywhere.

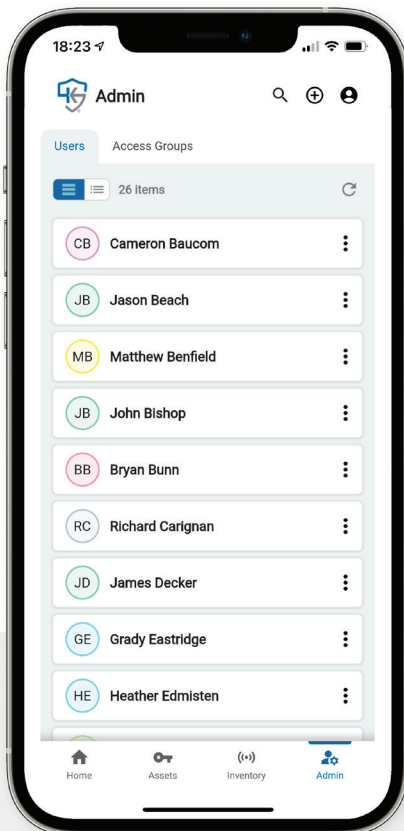

Your managers and sales team require convenience and efficiency in accessing the keys they require each day. KEYper GO brings all the powerful tools needed by users and administrators of your KEYper system right to their smartphone.

Your staff will no longer need to return to the cabinet to know if a key or dealer plate is available. They can identify who has an item checked out, contact them at the press of a button, and even transfer ownership of an asset in the field.

With KEYper GO, administrators can manage users and inventory with ease, check system and assets status, view transaction history, reservation requests and much more.

KEYper GO puts your entire key inventory in the palm of your hand!

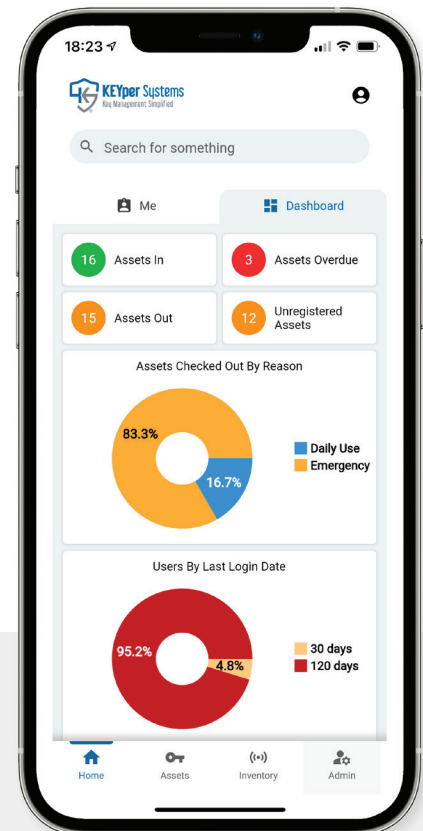

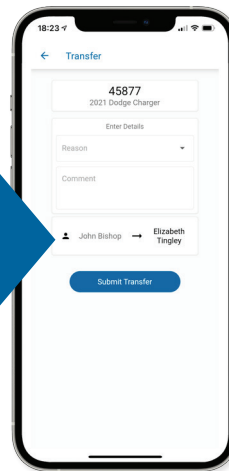

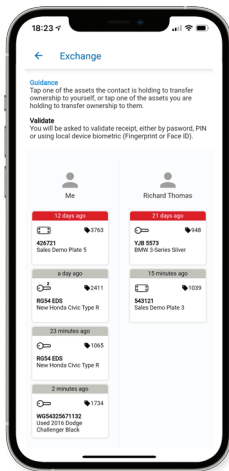

Give administrators access to everything they need for efficient system management

- Receive instant notifications on important system activity
- Check current system and item status
- See transaction history
- Manage users and items
- Manage access permissions
- Create key reservations
- And more

Scan to try the KEYper GO interactive experience

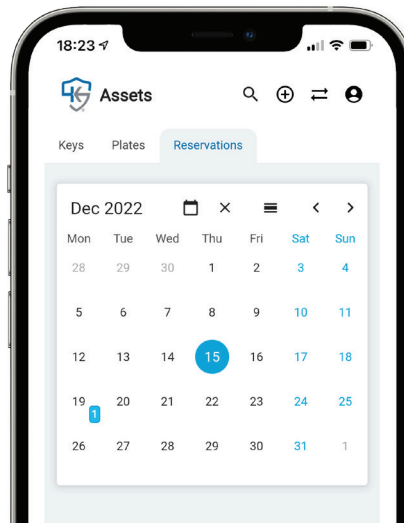

Transfer keys in the field

Allow authorized staff to transfer ownership of assets without returning them to the cabinet. In KEYper GO, both users validate the transaction, and the system retains a complete chain-of-custody record to maintain accountability for keys in and out of the cabinet.

Create asset reservations

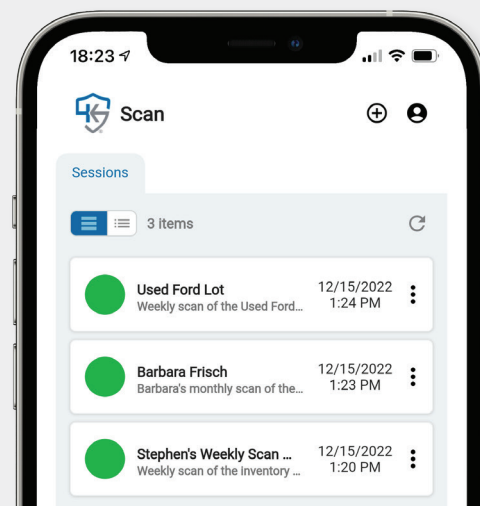

Staff can quickly reserve items on a specific date and time to guarantee that keys are available when needed, such as a scheduled tour.

Scan for fast and secure key transactions

KEYper GO offers multiple scanning options for enhanced system and inventory management. Use the camera on your mobile device or the handheld external Bluetooth scanner to quickly locate and identify labeled or tagged assets.

- Quickly access asset information and add assets into the system on the go
- Scan a vehicle to see if they key is currently available and make a reservation
- Scan a key to find a vehicle's lot location, and to see if other vehicles may be blocking it
