ANODES

ZINC | ALUMINIUM | MAGNESIUM

ZINC-IT ANODES

The anodes protect the metallic surfaces against the corrosion imposed by the water. In the order to ensure the continuous protection of the ships, reservoirs and underwater structures, a peridical substitution of the anodes is required.

Zinc-it anodes are produced in zinc, aluminium and magnesium alloys according to rigorous quality control and always accompanied by a quality certificate. Our metallurgical laboratory and ISO 9001 certification ensure that the produced anodes meet international standards of the clients' requiriments.

Our standard anodes range

We produce anodes for all kinds of vessels, ships and underwater structures.

ANODES

Zinc-it is a Portuguese brand of Zinc and Aluminium anodes for cathodic protection. Producing anodes since 2000, we are an experienced and dynamic team, providing tailor-made solutions in response to our clients' needs.

WE TAKE QUALITY VERY SERIOUSLY

Our modern lab and our daily quality control assure the top quality of all our products. As an ISO 9001-2015 certified company, this is the only way we can live up to the high quality standards demanded by the market. We also supply a quality certificate after thorough analysis on our spectrometer - SpectroMax F.

QUALITY AND FLEXIBILITY

Zinc-it is made for you. Here you will find suitable products for different boats and underwater and offshore wind power structures.

We provide quality products and detail-oriented solutions in a timely manner for our customers. Try it out.

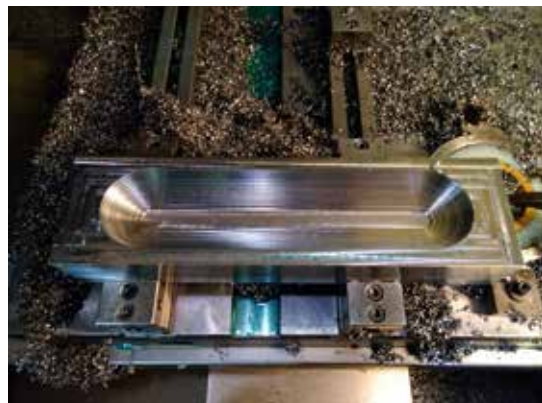

Standard anodes and tailor-made

We produce both catalogue anodes and tailor-made anodes to meet our clients' needs.

Anode's shape

Anode's shape as shown in the Catalogue or Tailor-made moulds.

Straps

Regular (10x20, 12x20, 14x20, 17x20 and 20x30) or Customized Straps.
