

# M360 Labeler

Linerless – The future of labeling

- Offers premium label presentation
- Improved efficiency with linerless labeling
- Fully automated and easy to use
- Flexible labeling applications

Pack a punch on  
the retail shelf  
with the M360

## Premium labeling

Marel's M360 standard wrap-around labeler employs the latest technology in flexible linerless labeling. It is designed for premium labeling of all popular tray sizes and is ideally suited for skin packs. Fully automatic, this high-speed labeler can apply standard wraparound linerless labels as well as C-wrap partial wrap-around labels and top labels.

### Fixed-weight or catch-weight

The M360 labeler is available as a stand-alone unit for fixed-weight packs or can be connected to Marel's weigh price labelers for catch-weight products.

### Easy to use

Setting up, changing labeling programs is quick and easy to do, and since there are more labels per reel, they don't need to be changed as often which makes for increased efficiency and less downtime.

### Linerless labels

The M360 uses linerless labels that offer improved efficiencies, volume applications and environmental advantages for not using carrier backing paper.

## Premium shelf presentation

With its unique combination of efficiency, consistency and flexibility, the M360 offers premium shelf presentation of all pack types. The standard wrap-around labels provide plenty of space to communicate essential product information and comply with all food-labeling regulations.

## Technical specifications

Throughput:	Up to 90 packs/min (depending on tray and label size)
Belt speed:	0.2-0.8 m/sec

	Length	Width	Height
Tray sizes: minimum	150 mm	80 mm	15 mm
Tray sizes: maximum	350 mm	300 mm	120 mm

	Length	Width
Label sizes: minimum	120 mm	50 mm
Label sizes: maximum	500 mm	120 mm

Power requirements:	110/230 V AC +/-10%, 50/60 Hz
Environment:	Temperature: 0-35°C; Humidity: 20-85% RH

# The M360 is designed for labeling of all popular tray sizes and skin packs

## Features

- Zero backing paper waste
- 40% less reel weight compared to self-adhesive labels
- More labels on a reel, fewer reel changes and less downtime
- Increased surface print area promotional information and branding
- Tamper evident for improved security and safety
- Can apply standard wrap-around labels as well as C-wrap partial wrap-around and top labels
- Environmentally friendly linerless labels
- Quick and easy to set up and use
