

EASY CLEAN™ 100

GENTLE HANDLING CONVEYOR

Ideal for bakery, food & pharmaceutical applications

Shuttleworth® has developed a New Generation of Stainless Steel Conveyors called Easy Clean 100. Like Shuttleworth's Easy Clean 1000 Conveyor, the Easy Clean 100 Conveyor is constructed using a stainless steel frame and Slip-Torque® technology. Easy Clean 100 is designed to provide greater value for our customers. Like all Slip-Torque conveyors, Easy Clean 100 Conveyors come in standard 1/2 meter lengths and up to 22 standard widths. We will also customize our product offering to your application needs. Shuttleworth conveyor systems are engineered to be suited for applications requiring gentle handling, low back pressure, accumulation, dividing, combining, indexing, or positioning for robot interfacing.

FEATURES AND BENEFITS

- **Simplified** - Bolted together, stainless steel frame – value-driven design ideal for bakery, pharmaceutical and food applications
- **Easy-to-Clean Design** – Designed to minimize areas where excess product can collect. Ideal for wipe down applications, as well as light wash down applications where harsh chemicals are not required
- **Modular Design** – Enables easy modification for product changes
