

A sustainable transport cooling solution for urban delivery

The solution that addresses the needs of chilled and frozen food delivery, taking into account product quality, your safety and the safety of your customers.

www.cryocity.eu

CryoCity™ delivers:

- Access to city Low Emission Zones (LEZ) = NO EMISSIONS
- An autonomous & continuous COOLING SYSTEM
- An add-on solution for every range of vehicle (EV, FHEV, CNG, HFCV,...)
- Safe Indirect Cooling

CryoCity™ - a sustainable and safe transport cooling solution for city deliveries

The Air Liquide difference? Our solutions are tailor-made and based on a thorough understanding of your needs. By using the knowledge of a network of global food and cryogenic experts; we deliver innovative solutions to give you competitive advantage in a dynamic market.

Other applications:

Alternative fuels:

Recuperation of biogas, production alternative fuels: Bio-LNG and H₂

BLUEEZE:

Sustainable alternative for transport* cooling based on liquid nitrogen (-196°C)

*Trucks > 3,5 T

Welding and cutting:

All gasses and gas mixes for maintenance or fabrication

Dry-ice:

For all your controlled & cooled transport packages

CryoCity™ Benefits

Autonomous system - NO extra electrical power needed. Ideal on electrical vehicles = bigger range

Fast pulldown (high power from -80°C of captured CO₂ - Green Origin)

More than 15 deliveries with fast temperature recovery after each door opening

For fresh transport up to volumes 16 m³
For frozen transport up to volumes 8 m³

No emissions of NO_x particles and no noise

Cooling autonomy
With >15 door openings of 2' duration

Quick and easy refueling

Minimum of rotating parts
Low wear & tear means low maintenance costs
