# INFEED CONVEYOR

## Feed weighing systems

The GKS Infeed conveyors are designed and built according to customer specifications. The unique conveyor concept guarantees a complete hygienic design, complete stainless steel construction and stainless steel drum motor.

The Infeed conveyor requires low maintenance and is easy to clean with a soft brush or with a slightly damp cloth.

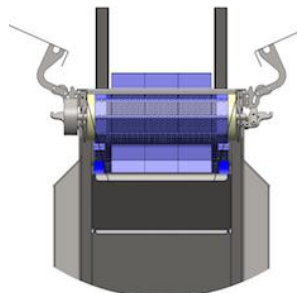

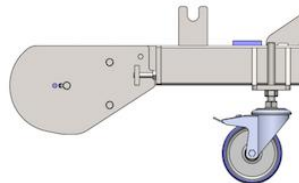

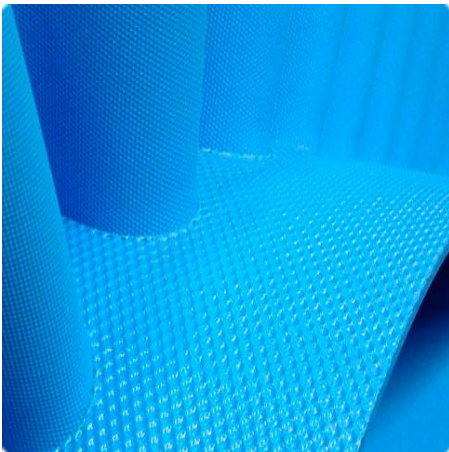

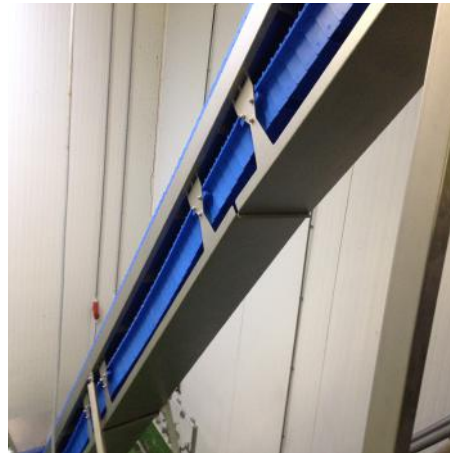

### Options:

Volta full PU belt with side walls

Volta full PU ITO 50 belt with side walls

Intralox belt (blue) with flights, food grade and removable side guards for easy cleaning

CIP installation
