Schoeller Allibert Returnable Plastic Packaging Solutions

➤ Combo Excelsior®

Schoeller Allibert

Innovating your logistics for a better world

Combo Excelsior®: the New standard Foldable IBC for International Logistics

Safe, hygienic and efficient for food processing, cosmetics and pharmaceutical industries

Outstanding performance

The Combo Excelsior® is strong and durable: its double wall structure enables a 1500kg unit load and a stack load of 8000kg (4 on 1). Maximum safety when stacked full thanks to the T shaped locking system between sides and ends and the smooth double wall lid, self-locking, water-tight and featuring straps locations.

Automation friendly

The Combo Excelsior® is fully compatible with most automated handling systems thanks to its reinforced smooth base and 3 skids.

The best logistics solution for maximised profitability

The Combo Excelsior® standard footprint 1000 L capacity and 3200kg dynamic load ensure optimised payload in road and railroad transportation.

The best folding ratio on the market: with only 341 mm incremental folded height, 7 folded Combo fit in a standard truck reducing reverse logistics cost and lowering environmental impact.

The most hygienic and safe foldable IBC

100% safe, easy to clean design from base to lid. No dirt or water traps, bugs and needle contamination proof.

100% smooth and double wall sturdy design increases internal volume and ensures compatibility with high speed filling processes.

Fork tine guides on base, strong three skids base and anti-slip plugs reinforce safety and speed handling.

Customisation

Multiple identification and tracking options: Logo and company name printing enhance brand awareness. Multiple bar code label and RFID pockets enable efficient fleet management.

Improved handling and labor saving

Easily erected and folded by one operator only: unique side walls locking while erecting enable one operator to handle the Combo Excelsior®. Non sequential folding saves time and labour.

Improved ergonomics and set up: the large easy to open and self locking drop door on front combines easy operator access zone while maintaining the panel strength thanks to its V shape.

Improved bottom discharge zone speeds up the liner and valve set up and removal: larger access and easy connection design for most valves on the market. Faster removal thanks to easy valve release system.

Dustcover on discharge zone ensures maximised hygiene during empty logistics and handling.

Maintenance

All parts can be replaced maximising the life span of the Combo Excelsior®.

Thanks to the patented close up bayonet fixing system, the skids can be easily replaced.

Reusable and sustainable

With a minimised number of parts, its UV and deep frost resistant material, the Combo Excelsior® is suitable for all harsh industrial environment and can stay stored outside on long time range. After its long service life, the Combo Excelsior® can be fully recycled lowering your carbon footprint.

Combo Excelsior®: Technical data

5602.200 - 1000 L - CE 265

Ext. (mm)	1219 x 1016 x 1133
Int. (mm)	1142 x 935 x 943
Runners (mm)	1208 x 1005
Weight (Kg)	90.0
Folded height (mm)	341
Stacked height (mm)	1113
Folding ratio	70.00 %

Mechanical performances :

Unit load: 1500 kg

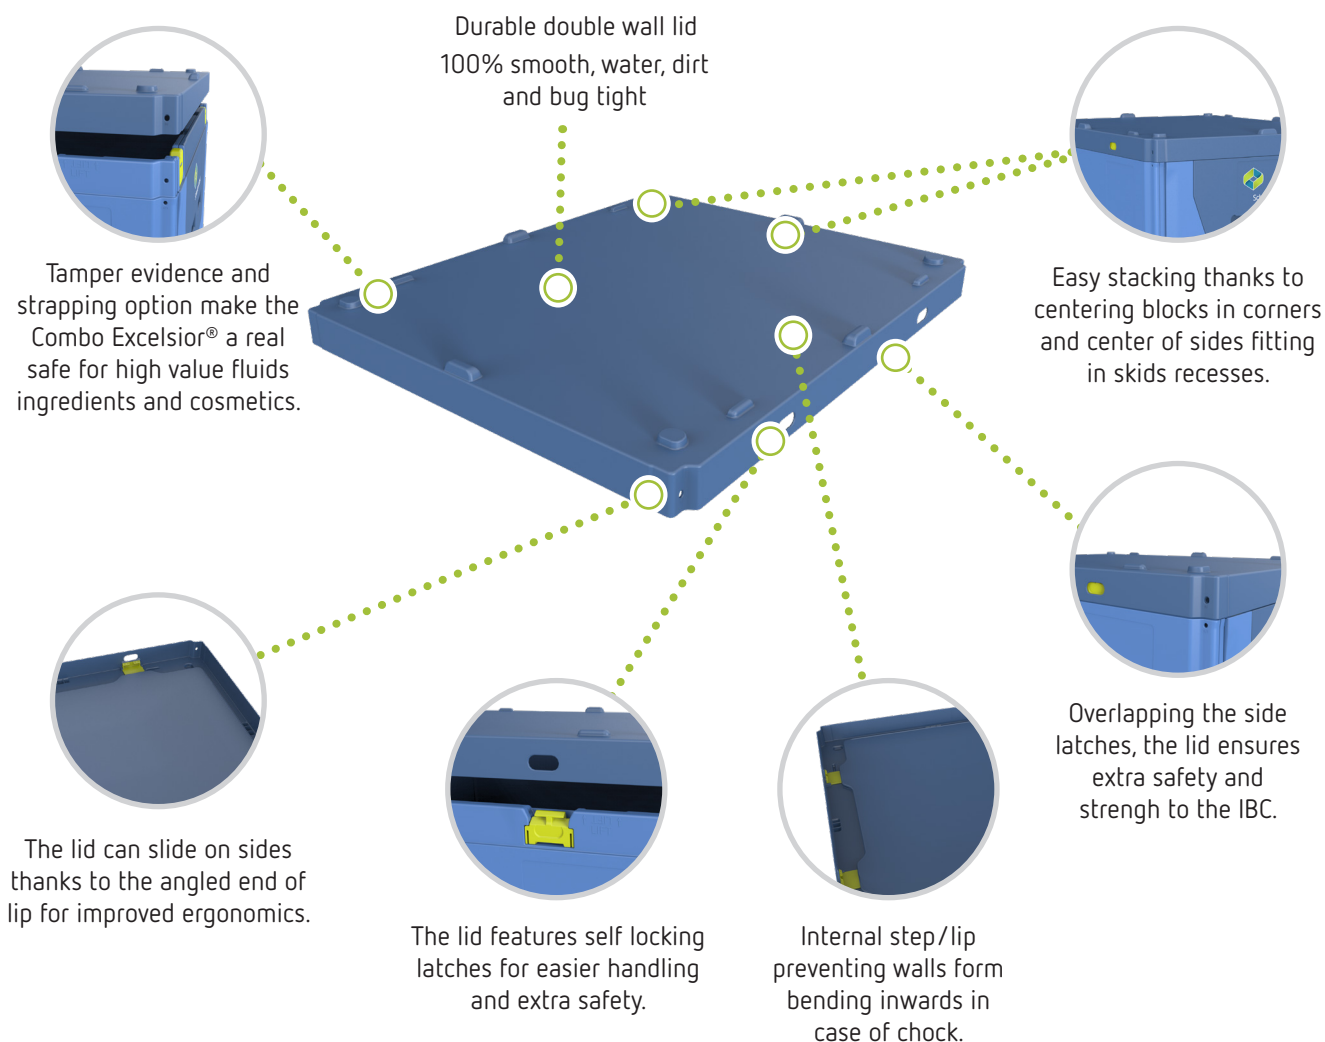

Stack load: 8000 kg (4/1)

Dynamic load: 3200 kg (1/1)

Features :

- Solid walls
- Reinforced solid smooth base
- 3 runners
- Lid included

Lid: unique features
