

DH Automation Cobot Basic Palletiser

Meet the DH Automation Cobot Basic Palletiser, a versatile and innovative solution designed to revolutionise your production line. With numerous implementations, this cobot continues to support users in automating a wide range of tasks, improving efficiency and maximizing returns.

Specifications

Robot Palletiser:

- **Payload:** 30 kg
- **Radius:** 1522 mm
- **Stack height:** 2300 mm
- **Weight:** approx. 430 kg
- **Footprint:** 1400 x 1700 mm

The popular multitasker

The DH Cobot Basic Palletiser is adaptable to all needs, equipped with the best tools from DH Automation. It excels in medium-weight palletizing, pick and place, packing, labeling and offers the fastest return. The lightweight and sleek design allows for seamless integration into any production line without disrupting the existing layout. When combined with an AGV, it provides cost-effective and reliable robotic mobility solutions.

More than general implementations

With its long reach and high payload, the DH cobot enables the development of numerous unconventional automation solutions. It breaks down barriers to automation while keeping budget in check, making it the ideal collaborative robot for innovative applications.

Experience the future of automation with the DH Automation Cobot Basic Palletiser at the Empack trade fair. Transform your production line with this cutting-edge innovation!
