

DEMATIC

Software Modernization

Adapt to Customer Demand with Dematic Software Modernization

Businesses of all sizes face constant challenges in meeting customer demands and expectations, while ensuring efficient operations without effecting their bottom line. Businesses must adapt to customers who expect orders to be delivered as quickly as possible (sometimes within hours of placing them), while managing labor issues, growing numbers of SKUs, and packaging variations.

Outdated software cannot meet these challenges in a timely and cost-efficient manner. It not only slows down operations, but it poses other costly risks such as downtime.

To remain competitive, businesses need software they can rely on to improve operations and adapt to change without causing disruption or increased costs.

Dematic Software Modernization Empowers Your Business to Keep Moving Forward

Agile and efficient operations are possible with Dematic Software Modernization. Updates to your software stack are done while your business is running, and Dematic Software solutions help meet customer demands as the market continues to change. Feel confident in your operations with services and solutions that optimize performance, strengthen defenses against data breaches, and eliminate unnecessary downtime.

With Dematic Software Modernization, you can expect to benefit from Dematic's Live Site Refit methodology that draws on years of experience modernizing software in place, in 24/7 live facilities — with minimal downtime and a risk averse approach. Our experts understand your operations and its importance to your business.

Advanced software provides access to the latest integration technologies, reporting and analytics, and up-to-date security standards, allowing you to apply the power of warehousing software throughout your business.

With the latest Dematic Software, you get access to new, modern features like predictive analytics, real-time decision making, and continuous monitoring.

What to Expect with Dematic Software Modernization

Reduce Downtime

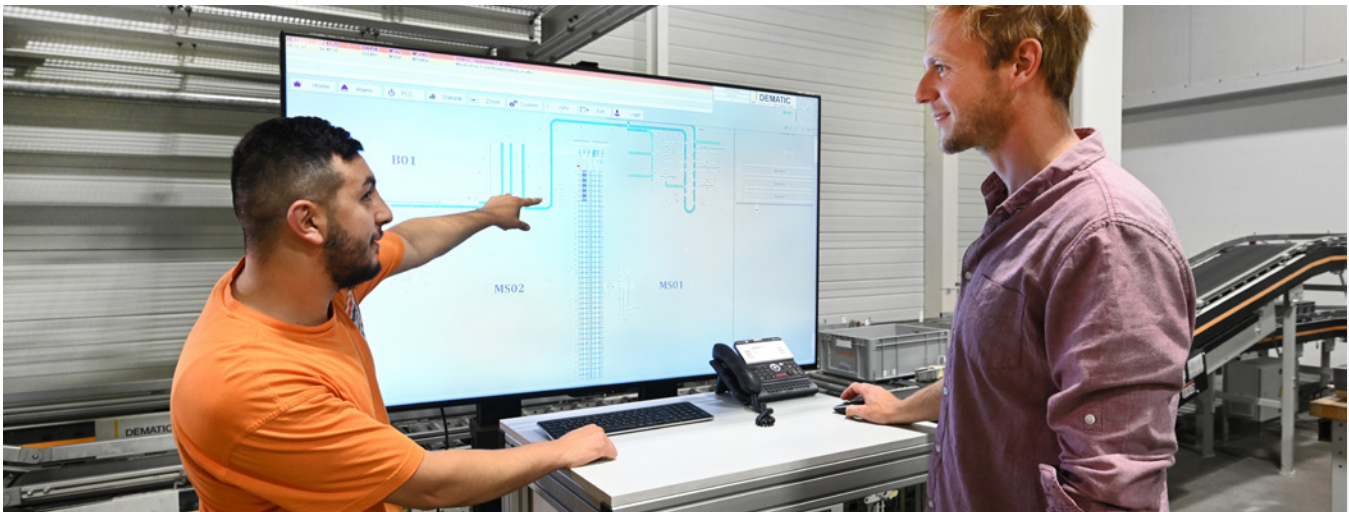

Outdated software leads to inefficient operations that cannot meet demand. Dematic Software Modernization minimizes downtime and maximizes uptime, meeting customer demand by providing new levels of efficiency with cohesive API integrations. Our software solutions can also provide new capabilities like advanced emulation and simulation training to test and drive performance.

Minimize Risk

According to Security Magazine, there are over 2,200 data breaches each day. This is the equivalent of nearly one cyberattack every

39 seconds. IBM's Cost of a Data Breach Report 2023 estimates a data breach can cost a company as much as \$5 million or more and can take an average of 277 days to identify and contain.

Dematic Software Modernization helps protect your operations against security threats to prevent major losses in revenue, operating time, and customer trust. With up-to-date software, you can expect the latest security protection across all layers of your software architecture, which is not available in older software platforms. And with our support and managed services, you can expect updates to the environments.

Improve Planning

Your business needs to prepare for a future where your existing software may become obsolete or face support constraints. Seeking expert guidance is crucial to effectively strategize for your operational future, regardless of how much the market changes.

Dematic Customer Service offerings help you to develop a software upgrade roadmap, forming a comprehensive operational strategy. Our account managers will communicate with you and your IT team prior to the sunseting stages of your software to allow enough time to develop upgrade plans with minimal disruption. Dematic also works with you on a holistic plan for your software, mechatronics, controls, and PLCs to create an optimal approach to modernizing your software.

Dematic's dedicated team of experts and our global footprint facilitate your software modernization goals at every step of your innovation journey. Rely on Dematic to seamlessly replace your existing software, offer personalized upgrades, and provide expert services to elevate your technology.

Power the Future of Commerce

Dematic is the global leader in materials handling systems, supply chain technology, and innovation. From intelligent software systems to robotic warehouse automation, we deliver operational efficiency with a suite of intralogistics systems for unparalleled performance. Dematic is here to empower partnerships, advance your supply chain, and revolutionize logistics.

Your Ambition. Our Mission.
