

# Floor marking systems

High quality self-adhesive lines and symbols  
designed for maximum durability

**etilux**  
SMART CONNECTIONS

A man with a beard, wearing a dark jacket and dark trousers, is using a hand-pushed applicator to apply yellow floor tape in a warehouse. The applicator has a large yellow roller and a handle. The floor is concrete, and there are some yellow lines already applied. The background shows warehouse shelving and equipment.

## **Floor marking solutions are applied in...**

**Warehouses**

**Factories**

**Hospitals**

**Supermarkets**

**Fulfillment centers**

**Distribution centers**

**Manufacturing plants**

**Airports**

## **Our products have many advantages over paint or resin marking systems**

Unlike liquid systems floor marking products can be instantly applied allowing the area to be used immediately afterwards.

If a change in your floor layout is required then our tapes can usually be removed without snapping or fractures eliminating the need to scrape. Lifting cleanly, without solvents is also really important for food preparation or pharmaceutical areas as no fumes are generated.

### **Minimal preparation**

The surface merely need to be clean, dry and free from grease. Porous surfaces may need priming prior to application. Our team are always happy to help with installation advice.

### **Fast application**

Our applicator is available for sale or hire. Long straight runs of tape can be quickly applied from an ergonomically comfortable stance.

### **Enhance your brand message**

Display corporate colours throughout your facility. We can match to any RAL, Pantone or NCS, please enquire for Minimum Order Quantities etc.

### **Great service**

Our team has many years experience supplying floor marking systems and can help advise on popular route planning strategies used in sectors such as aerospace, automotive, logistics and defence to name a few

# PermaStripe®

**World's most durable floor marking tape**

- Solid colour all the way through
- 1mm thick industrial PVC
- Strong permanent adhesive
- Die-Cuts

# PermaRoute®

**The world's only complete floor marking system**

- Tough laminate construction
- Strong permanent adhesive
- 960mu thick
- Cut to any shape

# PermaLean®

**The leanest industrial grade floor tape in the world**

- 570mu thick
- Strong permanent adhesive
- Laminate with printed design or message or solid material for Pantone and RAL colours

# PermaStripe®

**World's most durable floor marking tape**

- Solid colour all the way through
- 1mm thick industrial PVC
- Strong permanent adhesive
- Easy to apply
- Chamfered edge

## **PermaStripe® 3 year warranty**

The warranty for PermaStripe® floor marking tape is conditionally warranted 3 years from purchase. Warranty claims are only limited to replacement of PermaStripe®. The warranty does not cover items being dragged, pushed or scraped across such as pallets or transit skids.

**A solid single material. Unlike low quality printed tapes PermaStripe® won't fade or lose its colour. Even when scratched the colour continues all the way through so you can fit and forget knowing that the quality look you achieve on installation day will last as long as you need.**

Due to its extreme strength it will not snap if removed, enabling easy workplace 5S floor marking changes.

### Sizes & Shapes

Available in 50mm, 75mm or 100mm roll widths, 30m rolls for long length application. A wide range of ready cut PermaStripe® shapes allow you to create junctions and designate special areas, all to the same high quality.

**PermaStripe®**  
smooth

PermaStripe® Smooth floor tape was created in response to a request for a line marking material which was easier to clean. Our sleek, PermaStripe® Smooth has all the same benefits as our flagship PermaStripe® range but with one minor difference. It does not feature the embossed surface, meaning that there are no areas on it that can trap dirt and harbour bacteria.

PermaStripe® Smooth is perfect for areas that must meet heavily regulated hygiene standards. It still provides durable, 5S optimisation, with a smooth aesthetic surface that is easier to clean and would compliment any area to which it is applied.

# PermaRoute®

The world's only complete floor marking system

- Tough laminate construction
- 960µ thick
- Strong permanent adhesive
- Low profile
- Cut to any shape

Rolls of any width up to 1168mm can be produced to order

Stock sizes  
50mm x 30m  
75mm x 30m  
100mm x 30m

With PermaRoute® you're not restricted to simple lines. It's a versatile floor marking system which allows you to develop a clear set of visual guides. It looks clean and efficient and also helps your process controls.

Many stock colours and shapes make planning a marking scheme easy. In addition, features can be created to your specification, expanding the possibilities and making PermaRoute® an open-ended, future proof choice.

## PermaRoute® Die Cuts

PermaRoute® is a modular system complete with lines, angles, joins, shapes and icons in all industry standard colours. Corner joins and angles are available to fit stock roll widths of 50mm, 75mm or 100mm.

ABC DEF GHIJ KLM NOP QRST UVW XYZ

01234 56789

PermaRoute® schemes are used worldwide in factories, warehouses, assembly areas and logistic bases

## Floor markers

Many popular designs available in various languages and styles. See website for current range.

## Custom shapes

Custom shapes and features can be created to your specification further expanding the possibilities and making PermaRoute® an open-ended, future proof choice.

Our digital cutting table can cut any shape - just send your artwork or any outline image and we'll do the rest.

## Printed floor graphics

Any message or branding digitally reproduced in full colour on sheets of PermaRoute®.

# PermaLean

The leanest industrial grade floor tape in the world

- **570mu thick**
- **Strong permanent adhesive**
- **Laminate with printed design or message or solid material for Pantone and RAL colours**

## What is PermaLean?

PermaLean is an extremely tough floor marking material. The film thickness is an incredible 500mu (0.5mm), it is designed for application when normal floor marking tapes just aren't good enough, it is designed to be applied and forgotten, it has a super strong permanent adhesive that once down, stays down! The leaner profile suits itself well for minor irregularities on the floor. PermaLean offers resellers fantastic reselling margins always backed up the class leading Heskins service levels.

## PermaLean construction

For the plain coloured styles it is produced from a solid homogeneous piece of colour plastic film that is 500mu thick. For hazard chevron colours, to ensure that you get the most durable hazard possible, we print onto a 250mu base film then laminate a tough clear 250mu upper film to ensure that the pattern can never be scratched off!

**Print is protected under a thick upper layer, it cannot wear off .**  
**Mild embossed laminate to help prevent slips.**

**Coloured material means appearance of scratches or cuts is minimised.**  
**Mild embossed laminate to help prevent slips.**

## PermaLean Sizes & Shapes

Maximum roll width is 1260mm. Smaller widths are available down to 15mm. Die-cuts can also be produced in any size up to the master roll width.

Our stock range of H6905 PermaLean die-cut designs can be produce very quickly, but any custom shapes will be considered (minimum order quantities and additional tooling costs are required).

## Accessories

Our system is so simple that few accessories are needed but some care taken in preparation will certainly improve the durability of your installation.

### Surface Primer H3506

Surface primer is ideal for sealing porous surfaces such as wood, concrete or stone prior to application of our anti slip tape to prevent moisture degrading the adhesive; it also greatly helps to create an extra bond on other surfaces.

### Seam roller

Seam rollers are available to help increase the durability of your anti slip tape or floor marking tape application. By using the seam roller once you have applied your anti slip or floor marking tape, by applying pressure to the surface with the seam roller, this increases the bond between the adhesive and floor surface. This results in a quickly cured surface with a durable application.

### IPA Cleaner H3508

To effectively clean surfaces before our grip tape is applied we recommend IPA cleaner; it helps to remove contaminants, it does not leave behind a greasy residue unlike methylated spirits, petrol etc.

Isopropyl alcohol (IPA) as an alcohol-based cleaner is fast drying, so will leave your application surface clean and dry very quickly.

### Edge fix H3502

Edge fix sealer greatly helps to prevent the lifting of the Safety-Grip™ anti-slip in high traffic areas. One simply applies the edge fix down the side of the tape using the narrow nozzle built into the tube, it helps to secure the product and extend its life.

### Keying agent H3510

Keying agent, applied in small amounts, will increase the amount of energy in an otherwise low energy surface and help create that efficient and durable bond.

### Applicator

Available to buy or hire our applicator makes the job of laying long lengths of material as simple as walking in a straight line.
