

A home for your goods

Your goods find a safe haven in our warehouses in the vicinity of the Antwerp and Rotterdam Port. All our warehouses are fully isolated and well secured. Smart IT systems ensure smooth and flexible warehouse management and enable tailor-made solutions, such as online tracking of goods and paperless administration

Our services

The Sany group offers you a large range of logistic services for storage and handling of various goods. We have all it takes - the necessary accommodation, equipment, and trained, experienced staff - to make us your perfect logistics partner.

Our services include the complete range of handling of goods, such as repackaging, order picking, pick & pack and quality control.

All kinds of goods

We store all kinds of goods, including excise goods (beer, wine, etc.) and hazardous goods. The goods can be stored on the ground or in racks.

Bonded Warehousing

We own several public bonded warehouses (including VAT-warehouses) where your import, export and transit goods can be stored safely and in compliance with all customs regulations. All our bonded warehouses are fully AEO certified.

Certificates

We hold various certificates with regard to logistics:

- FCA certificate for handling, storage and transport of fodder.
- Certificate for the handling, storage and transport of bio products.
- FAVV authorisation for the handling, storage and transport animal nutrition and wood.
- Certificates for the handling, storage and transport of dangerous goods.

IT and security

As an experienced logistic group of companies, we know how to digitalize our business effectively. That's why we are involved in the development of the IT-tools we are using.

Tracking & tracing

Since our procedures are fully digitalized, we can offer you complete tracking & tracing service with regard to your goods. At any time you can trace the whereabouts of your cargo by means of our dedicated interface.

Safety and security

Our warehouses are continually monitored by cameras - both inside and outside, as to secure maximum safety. The same goes for fire monitoring.
