

yooBeeEYE equips your Material Handling vehicles with a unique set of vision, and sensor-hardware (eyes and brains) to make them really smart.

Our plug & play solution improves safety and boosts performance in your warehouse operations.

Discover how you can win big on logistics' productivity, security and efficiency. Just give us a call.

Don't waste time scanning

What if you don't have to scan pallets and locations over and over again?

Work faster, a lot cheaper and more reliable

yooBeeEYE TRACK enables scan-free operations, automatically tracks all pallet-movements and provides a digital twin of your warehouse in real time. Achieving an unprecedented increase in productivity and inventory accuracy.

Make your warehouse safer

What if you could detect hazards before they even occur?

Prevent collisions and empower behavioral change

yooBeeEYE SAFE tracks the precise, real-time location of any MH vehicle on your premises to prevent collisions with racking, vehicles and persons. It even signals all violations of the safety guidelines, in real time.

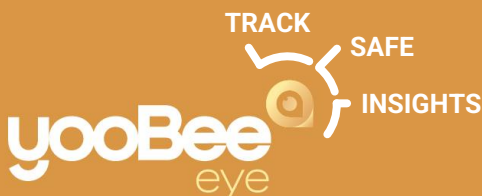

Create a zero accident workspace in your dynamic and changing environment.

Reveal powerful insights

What if this data could be consolidated, analyzed and visualized to drive really smart improvement plans?

Take the right actions based on actual location-based data

YooBeeEYE INSIGHTS reveals a new standard of visibility from the warehouse floor to the boardroom. Unique insights into what is happening where and when over your operations. We enable as yet unforeseen improvements in safety, productivity and efficiency process optimization.
