Sound level	<30-63 dB(A)		
Power supply	200-240V, ~50-60 Hz, 3.3A		
Energy consumption	9-730 W		
Certifications and compliance	       		

Custom-fit air cleaning for production and logistics

The QleanAir FS 70 is a versatile air cleaner developed for businesses that need to manage their indoor air quality, such as manufacturing industries, warehouses, and logistics. The air cleaner captures particles and gases using multi-stage filters before returning the cleaned air to the environment or distributed to a specific area. The filter configuration and accessories such as air distribution tubing, vents, bends, and textile diffusers are custom fit to the challenges and needs on the location. The units work independently of the ventilation system, use the standard power socket, and can be easily relocated if necessary.

The QleanAir Difference

With a significant impact on health, performance, and quality there are few things as important as clean air. We deliver clean air as a service with hassle-free installation, maintenance, upgrades and filter changes. With our unique Lifetime Performance Guarantee, we can guarantee your air quality over time.
