

Optimize and perform Where telematics meets ROI

Workforce compliance

From paperwork to streamlined processes

Payday is rarely straightforward. Driver hours must be collected, verified, and corrected before wages and expenses can be processed. Different CBAs and country rules increase the risk of errors, while leave requests add overlaps and extra admin. Instead of focusing on strategy, managers get tied up in manual checks. Does this sound familiar in your business?

With our platform, wage and expense calculation no longer consumes valuable time. Driver data is collected automatically, corrections are simple, and calculations follow the right CBA and country rules. Dashboards give instant oversight with direct payroll export and ready reporting. Managers can finally rely on accurate figures and focus on running the business and serving customers.

- **Complete driver activity data**
Capture all of the driver activity data in an integrated tool
- **Leave management**
Streamline leave planning and ensure business continuity
- **Wage cost visibility**
Obtain accurate visibility on real operating costs
- **Easy wage and expense calculation**
Automate wage and expense administration
- **Compliance management**
Avoid compliance breaches with different CBAs across countries
- **Clear insights**
Use reliable data for smart decision-making
