MAGNETIC CORNER PROTECTION PROFILES

Visually marking angular and sharp corners with gentle curves reduces the risk of injury and protects shelves, walls and machinery from damage. These magnetic, flexible corner protection profiles are ideal for indoor use for marking hazard zones and reducing impact injuries.

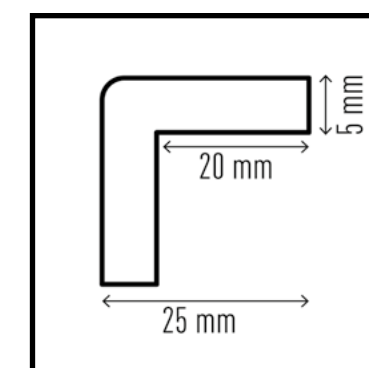

- Flexible corner protection profile made from polyurethane foam with magnetic attachment
- For indoor applications
- Ideal for use in production facilities, dispatch departments, warehouses, basements, stairways and garages as well as on shelves, cupboards, machines, storage trolleys, etc.
- Mark hazard zones, protect surfaces and walls and mitigate impact injuries
- Colour similar to RAL 1003/9004 signal yellow/ signal black
- Fire tested according to DIN EN 13501-1:2018-12
- Temperature resistant from: -30°C - + 70°C
- Working temperature: -30°C - + 70°C
- Profile length: 1 m
