

Why Logistics Solutions?

To meet the ever-growing demand of consumers in today's global economy, you need state-of-the-art logistics - smart and fully connected. Toyota Material Handling delivers the right solutions: our automated guided vehicles, fully integrated systems and high-density storage solutions are the key to improving your overall performance.

At Toyota Material Handling, we also know the importance of comprehensive and robust after-sales service. That is why Toyota is committed to providing tailor-made solutions for each customer, with an extensive network of technical service providers and a customer service department available around the clock, with VPN access for real-time problem solving. We look at each case individually and offer the best solution, ranging from preventive maintenance and full-service packages to remote monitoring and financing options.

TOYOTA

MATERIAL HANDLING

1. System Integration

Need to make your warehouse run like clockwork? With our integrated custom-made solutions, we provide the glue between every single element. Using the latest technologies, we ensure maximum efficiency for the reception, storage, order preparation and packaging & shipping of your products.

We integrate:

- Multishuttles
- Miniloads
- Autostores
- Pallet cranes
- Roller conveyors
- Sorters ...

2. Automated guided vehicles

Need to take full control of your operations? Smart warehouse trucks solve quite a few of your hardest challenges. Our team designs a tailor-made system and implements it on the spot. From then on, your trucks can be monitored full-time, allowing you to optimize every single aspect of your operation.

Benefits for your business:

- Better productivity
- Less damage to goods
- Safer warehouses
- 24/7 support
- ROI between 2 and 3 years

3. Semi-automated high-density storage solution

Need to make the most of your warehouse space? With our shuttle solutions you can store deeper and higher whilst eliminating aisles. Our high-density storage system will increase your storage space and improve throughput. The Radioshuttle pallet carriers travel fast but safe through the racking, optimising your truck fleet, staff time and cost.
