

TAS

Transport software
that grows with you

Core modules

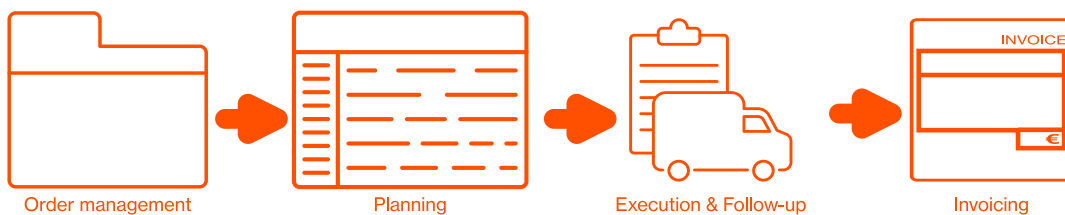

- Order management
- Planning and dispatching
- Transport tracking
- Customer portals
- Invoicing & e-invoicing
(Peppol ready)
- Reporting and analytics

TAS is the digital heart of your transport organisation.

This powerful and user-friendly TMS solution supports hauliers and logistics providers in managing and optimising their full operational process, from order entry and planning to follow-up, invoicing, reporting and analysis.

Curious? Request a demo at:

sales@tas-tms.com or
www.tas-tms.com

Manage your entire transport process in one place – from order to invoicing.

Why choose TAS?

- Modular structure: activate only what you need
- Suitable for both small and large fleets
- Integrates with on-board computers, accounting software, ERP, etc
- Less admin, more control
- Cloud version available, secure and accessible anywhere

TAS by Sinari: simple, powerful and ready for the future.

TAS prepares you for today's challenges and tomorrow's requirements, such as mandatory e-invoicing in Belgium from January 1st, 2026.
