

E-invoicing TAS

Fully digital. 100% compliant.

Ready for 2026.

Peppol

TAS supports the entire e-invoicing process in line with Peppol requirements, including validation, sending, receiving, and tracking of invoices and all directly from your familiar working environment.

No more manual steps, no extra tools needed: you continue working in TAS as usual, while the digital invoicing runs automatically in the background.

TAS E-invoicing: no more worries about Peppol

As of January 1st, 2026, the Belgian government will require e-invoicing for all B2B companies. This means invoices can no longer be exchanged via PDF, but must be transmitted through the Peppol network.

And TAS is ready for it!

No separate e-invoicing software needed. You create invoices as always and TAS takes care of the rest.

Simple. Efficient. E-invoicing with TAS.

- Fully integrated into TAS
- Peppol-ready and legally compliant
- Automatic validation and sending
- Faster processing, fewer errors
- Real-time tracking and status updates
