CROSSLINKED HYALURONIC ACID FILLER

Flawless

WITH LIDOCAINE

QUIVER
MEDIC

The premium multi layered filler,

Flawless

F Fine

- HA: 20mg/ml
- Needle: 27G ½' / 30G ½'
- Purpose: Fine Wrinkle Correction
- Injection Depth: Mid Dermis

D Deep

- HA: 20mg/ml
- Needle: 27G ½' (2ea)
- Purpose: Deep Wrinkle Correction
- Injection Depth: Deep Dermis

Q Sub Q

- HA: 20mg/ml
- Needle: 25G ½' (2ea)
- Purpose: Volumizing & Contouring
- Injection Depth: Sub Q Layer

01 Product features

Safety

Quick
correction

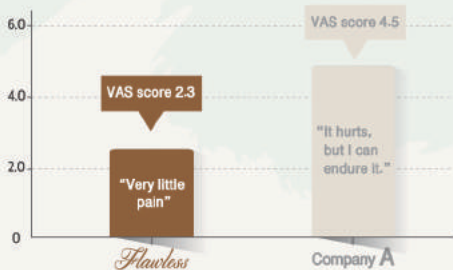

Less
swelling

Less pain

Less Pain

Pain Index VAS Score

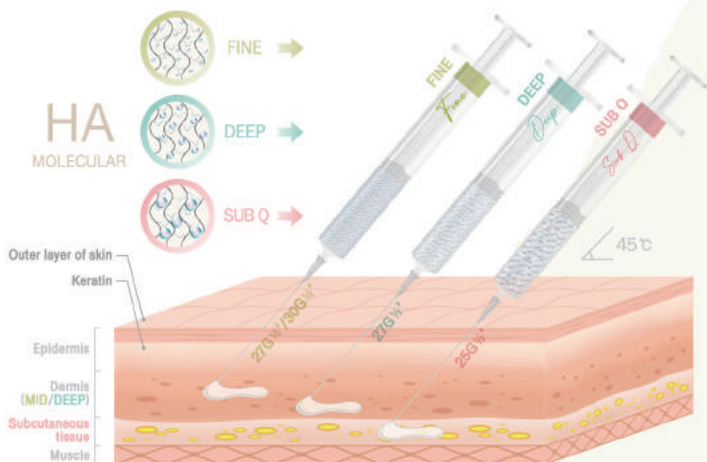

Ref. Clinical report for approval by the Ministry of Food and Drug Safety

A comfortable procedure with minimal pain

1. Contains Lidocaine 0.3%
2. Can be treated immediately without topical anesthesia.

02 Injection Skin Layer

Flawless

Flawless has the world's first patent for this technology!
HA filler that realizes Multi-layered Phasic

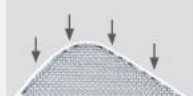

Multi-layered Phasic

The combination of HA Particle and HA Gel provides good lifting and holding force.

Biphasic

The surface may be uneven and produce unnatural results.

Monophasic

It's easy to collapse because of its low elasticity.

Flawless has a **Multi-layered phasic** form in which two layers exist together over time in the body.

World's first Multi-layered Phasic Filler

Bound polymer chains (layer) & Unbound polymer chains

Bound polymer chains (layer)

Unbound polymer chains

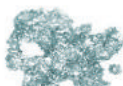

- Layer refers to bound polymer chains that determine the lifting capacity.

Layer A & Layer B

Layer A

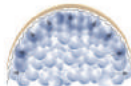

Layer B

After In Vivo Injection Layer type

Layer A
(cross-linked gel)

Layer B
(cross-linked particles)

- Layer refers to unbound polymer chains before mixed to be Biphasic and Monophasic.
- Layer is important because only the layer remains in the body for a certain time after injection.

The premium multi layered filler,

Flawless

Flawless fine

Flawless deep

Flawless sub Q
