Period of Use	3 years from date of manufacture

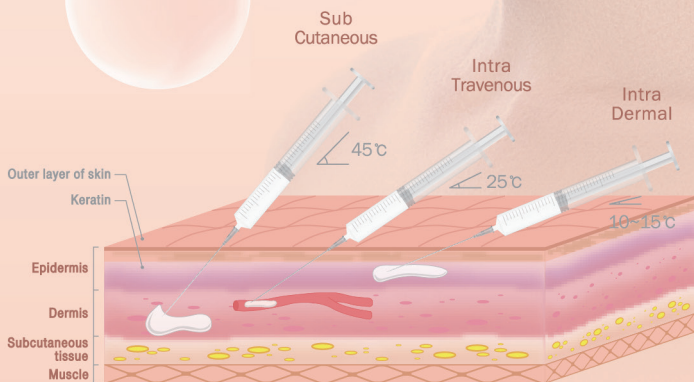

• Type of Injections

1
Short time
to effect

2
Long
lasting

3
No
side effects

• Skin Elasticity Recovery

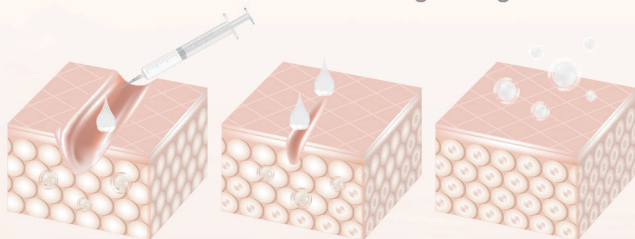

Promoting collagen regeneration

Attracts surrounding collagen tissues.

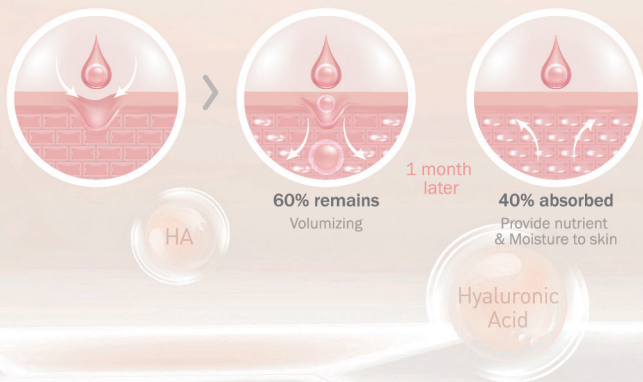

• Skin Tone Improvement

Activates metabolism of collagen regeneration

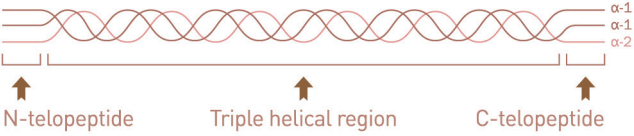

• Long Lasting Period

About 1 to 1.5 years

* Atelocollagen?

Type I collagen

Protease treatment

Atelocollagen

Absorption rate according to molecular weight

low molecular fish collagen > Polymer Pig Collagen

Molecular size DOWN ! Absorption rate UP !

Collagen > Absorption Atelo Collagen

* When injected directly into the skin, **pig collagen** absorbs better.

pH
6.0 ~ 8.0
