Manual | Track your performance

Welcome to the fourth and final step in My Easyfairs. You've participated in the fair and now it's time to follow up on the lead you've generated during participation!

'Track your performance' consists of a maximum of two steps available from a GoLeads package. When you have a GoVisibility package, you do not have access to these steps. Would you like to be able to follow up on your achievements of your fair participation nonetheless? You can always upgrade your package enabling the downloading of leads.

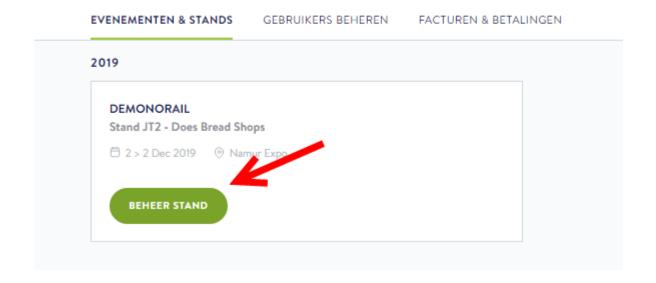

Step 1: Smart Badge (available with GoLeads, GoPlus and GoPremium)

Step 2: Visit Connect tool (available with GoLeads, GoPlus and GoPremium)

Let's go!

When you're logged in to My Easyfairs, you click 'manage stand'

You will then be directed to the overview below. You'll see a timeline with the following steps that are available in My Easyfairs:

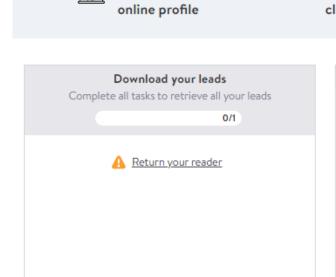

Invite your

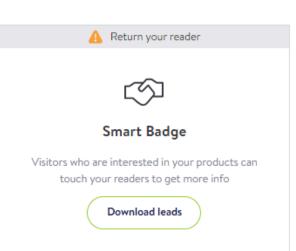

clients & prospects

- Manage your online profile
- Invite customers and prospects

Manage your

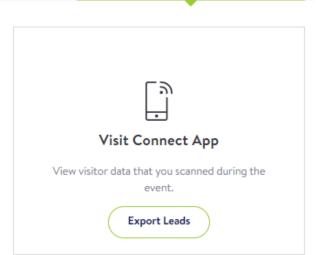

- Manage your stand
- Track your performance

Manage

your stand

Track your

performance

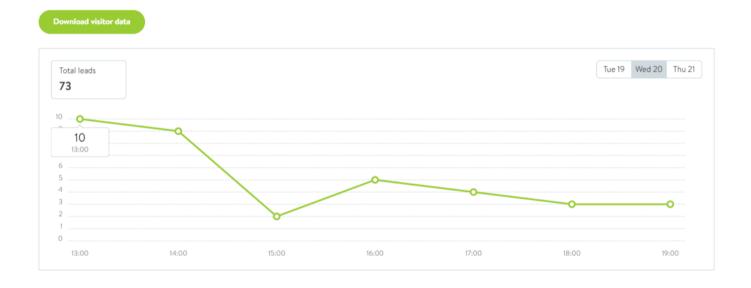

Step 1: Smart Badge (available with GoLeads, GoPlus and GoPremium)

The event has ended and we hope your participation has been very successful! Of course your Smart Badge reader was at a prominent location in your stand, allowing visitors to easily scan your reader with their Smart Badge. Perhaps you didn't have the time to personally speak to all visitors of your stand during the event! You can take the time to do that now. At this step in the profile, you can easily see how many visitors have shown interest in your organisation during the event. With a GoVisibility package, you can see how many visitors this concernes and with a GoLeads, GoPlus and GoPremium package, you can even download leads! When you click 'download leads', you will be directed to the overview below where you can download visitors' information and see when the event was busiest.

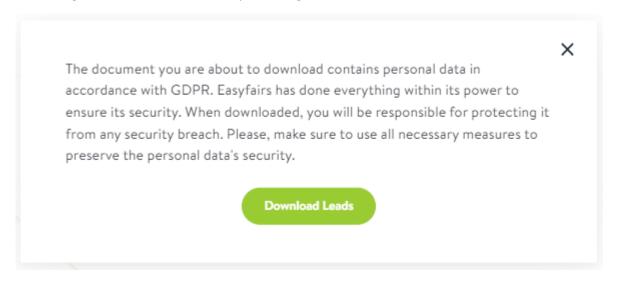

Smart Badge

When visitors touch one of your readers with their Smart Badge, they collect all the information you have linked to it. We will send them this information by email at the end of the day in their visit summary. In return, you get the data of everyone who has touched your readers. You can download those leads at closing time on the last day of the event.

Make sure you don't forget to return all your readers. Only then you will get the leads.

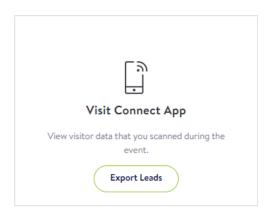

When you subsequently click 'download visitor data', you'll see a GDPR notification after which you can click 'download leads' and can save the Excel file containing all information for further processing!

Step 2: Visit Connect tool (available with GoLeads, GoPlus and GoPremium)

When you've purchased a GoLeads package or higher, you will receive Visit Connect licences. Visit Connect is a tool you use as registration tool for conversations held during the event. Where the Smart Badge is used by visitors when the visitors want to, you as exhibitor are in charge of the use of Visit Connect. With the Visit Connect tool, you ask the visitor for consent to scan his Smart Badge after having had a face-to-face conversation with this visitor. You use this app as digital business card, giving you the information of the business relation you've just talked to, and allowing you to add important notes. This means you can easily qualify your leads and follow up on these. Click on the button 'Export leads' and in the following screen on 'Download leads' to go to Visit Connect.

Go to the Leads tab in Visit Connect to see and export the leads.
