

# AMP Clarity™ + AMP Cortex™

Software Data Portal with Robotic Sortation

## Product Datasheet

Meet AMP Clarity, AMP's Software Data Portal for automated material flow visualization and reporting. Clarity empowers AMP Cortex users to dynamically review robot performance, adjust picks on the fly, run reports, and receive system alerts remotely. AMP Clarity is powered by AMP Neuron™ the industry's most powerful and experienced material categorization AI network and facilitated by AMP Vision™ a modular real-world material capture system.

## AMP Clarity in Operation

Remotely access and control robotic configurations

Review user-friendly material flow and robot performance modules

Automate data driven reports and gain operational insights

# AMP Clarity Offerings

Activate a complementary version of AMP Clarity for your AMP Cortex installations or subscribe to AMP Clarity Premium for full picture material composition data and reporting capabilities.

<b>Unlimited Clarity User Accessibility</b> Web based access allows for unlimited users and access points to the AMP Clarity Portal.	<b>AMP Clarity + AMP Cortex Free Version*</b>	<b>AMP Clarity + AMP Cortex Premium**</b>
<b>Cortex Pick Metrics</b> Remotely review robotic system performance and generate reports for operational insights.	✓	✓
<b>Cortex Status</b> Real-time view of robotic installation status along with key facility systems status over a 24 hour period.	✓	✓
<b>Cortex Pick Assignments</b> Real-time remote updating of robot system sorting priorities. Adjust robot targets on the fly to suit operational needs.	✓	✓
<b>Real Time Cortex Alerts</b> Create custom alerts that you can send via email or SMS***	✓	✓
<b>Material Dashboard</b> Interactive charts showing AMP Vision system target counts, material composition and material trends.	X	✓
<b>Material Mass Estimation</b> Real time mass tracking based on AMP Vision counts or AMP Cortex picks. Tailor the mass defaults to your personal operation.	X	✓
<b>Real Time Material Alerts</b> Create custom alerts that you can send via email or SMS*** regarding material flow.	X	✓
<b>Historical Analysis &amp; Reports</b> Run and export recurring reports for material composition analysis at given intervals. Access all historical material data detected from first install to current captures.	X	✓
<b>Real Time Cortex Alerts</b> Use the Stopwatch feature to initiate a controlled real time report of material composition for gaining material insights.	X	✓

\* Clarity Free Version offered standard for all Cortex installations

\*\* Clarity Premium level features include an additional subscription cost

\*\*\*SMS notifications requires opt-in and acceptance of AMP Robotics' terms and conditions of use. (Data rates apply) regarding robot events.

## AMP Clarity™ Technical Specifications

Access Considerations	User Communication*	Browser Compatibility
Internet connection PC & Tablet Recommended min screen size: 1024px	SMS Email message 6 display languages* Imperial/Metric units 12-hour/24-hour clock	Google Chrome Microsoft Edge Apple Safari Firefox

\*SMS and email messages require user opt-in and consent to AMP Robotics terms and conditions of use

\*\* English, French, German, Polish, Japanese, Spanish

See with AMP Clarity™  
 where you can take action to  
 improve your bottom line.

#### LEGAL COMPLIANCE

This product is UL-marked in accordance with the following directives:  
 The control panel is UL508A listed as an enclosed industrial control panel for installation in the United States.
