BAR SIZER

BAR SIZER

THE WELL-PROVEN SCREENING-SOLUTION
FOR A BLOCKAGE-FREE PRE-SCREENING

Application: Pre-screening in the range of approx. 80 bis 400 mm

Screening materials: MSW, industrial and bulky waste, wrappings, biomass, matured timber, plastic waste, e-scrap, roofing paper, shredder-fractions, rubble, ...

BAR SIZER

THE WELL PROVEN SCREENING-
SOLUTION FOR A BLOCKAGE-FREE
PRE-SCREENING

ADVANTAGES & BENEFITS

- Efficient pre-screening of different materials
- Minimum wear through robust execution
- Blockage-free pre-screening through one-sided fixing of the gate bars
- Adaptable and adjustable separating cuts
- Variable mesh sizes
- The SPALECK bar sizer is designed as a circular vibrating screen and geared with two imbalance motors
- The individually arranged and adjustable screening-bars allow the processing of different mesh sizes. The design of the sizer elements avoid a blocking of material, ensure an almost maintenance-free operation and enable a versatile usage.
- Modifications can be easily made at the adjustable and changeable screening-bars
- The machine is optionally available with a stationary dust-protection and an isolation-frame for compensating the dynamic loads

Suitable for MSW, industrial waste, plastic waste, biomass, roofing paper, ...

For highly efficient pre-screening of a wide range of materials

SPALECK bar sizer with optional dynamic fingers for an optimal loosening of the material

SPALECK®
