we cover all applications**

# LUXURY VINYL TILES: DANCING TO THE RHYTHM OF SUCCESS!

**Luxury vinyl tiles (LVTs) are becoming increasingly trendy. That's why THOMSIT offers perfect systems for each and every application.**

Whether wet or dry bonding, permanent fixing or loose lay of self-adhesive tiles: We at THOMSIT offer optimum solutions for every type of installation. Our portfolio is as comprehensive as necessary and as streamlined as possible.

All systems are safe – from the ground up – and have been extensively tested by experts. They feature perfectly matched products: from subfloor preparation all the way to the final work step.

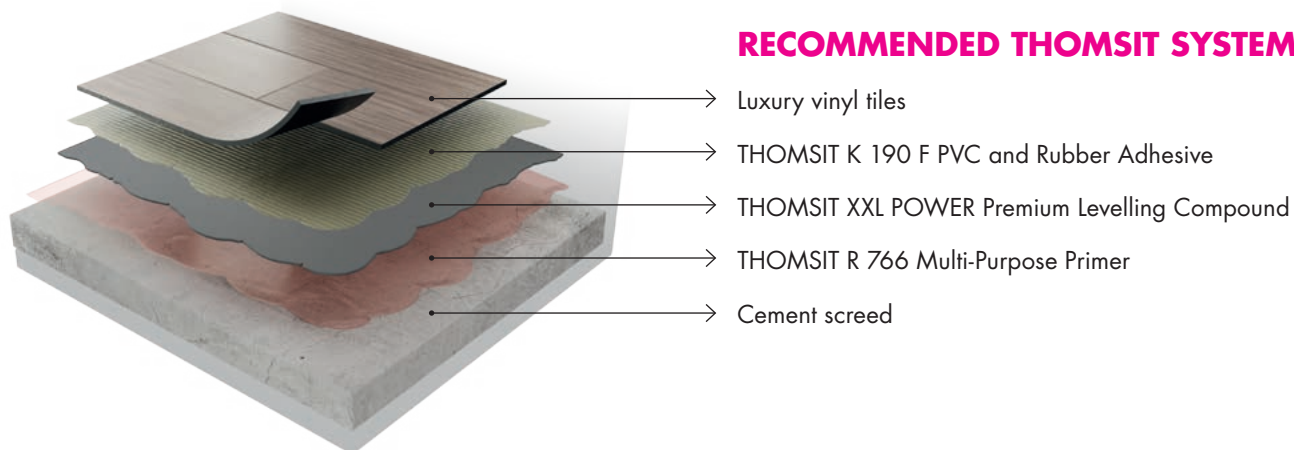

**With THOMSIT you can tackle every site. Make it!**

Luxury vinyl tiles are a growth market. Benefit now! If you have questions, we will be glad to help you with advice. Naturally also on site!

# WET BONDING

## FOR MAXIMUM SAFETY

Professional craftsmen put their trust in wet bonding. Naturally, to provide quality floors to your customers, you also need quality products. When using the wet bonding method for flooring installation, our new **THOMSIT K 190 F** sets the pace. It features easy application, long open time and low consumption. The flexibility it offers makes your work noticeably faster and easier.

## THOMSIT K 190 F

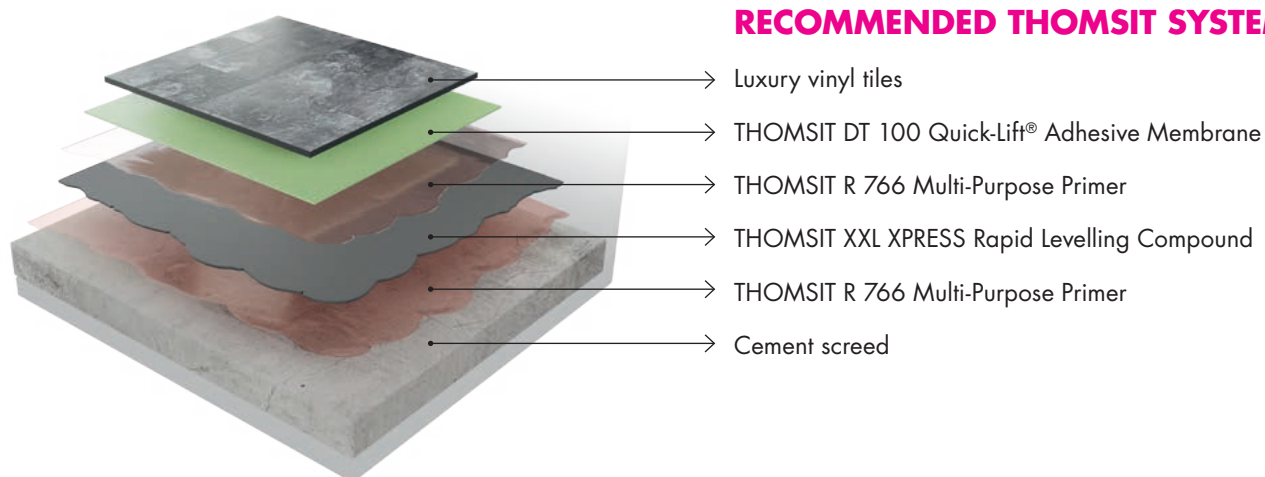

- Easy application and spreadability
- Long, flexible open time
- Fiber-reinforced and high shear strength
- Good wet adhesive strength paired with a hard adhesive bed
- Low consumption

# DRY BONDING

## RENOVATION – QUICK, SAFE AND DUST-FREE

The use of dry adhesives for floor renovation means fast work progress without dust or noise pollution and without tedious drying times. The motto of our dry adhesive range: Less is more. With our **THOMSIT DT 100 Quick-Lift®** Adhesive Membrane, for example, you're always well prepared and perfectly equipped for quick renovation jobs. The membrane is coated on both sides with adhesive, thus allowing easy and residue-free removal of the old floor covering without interrupting any ongoing operations.

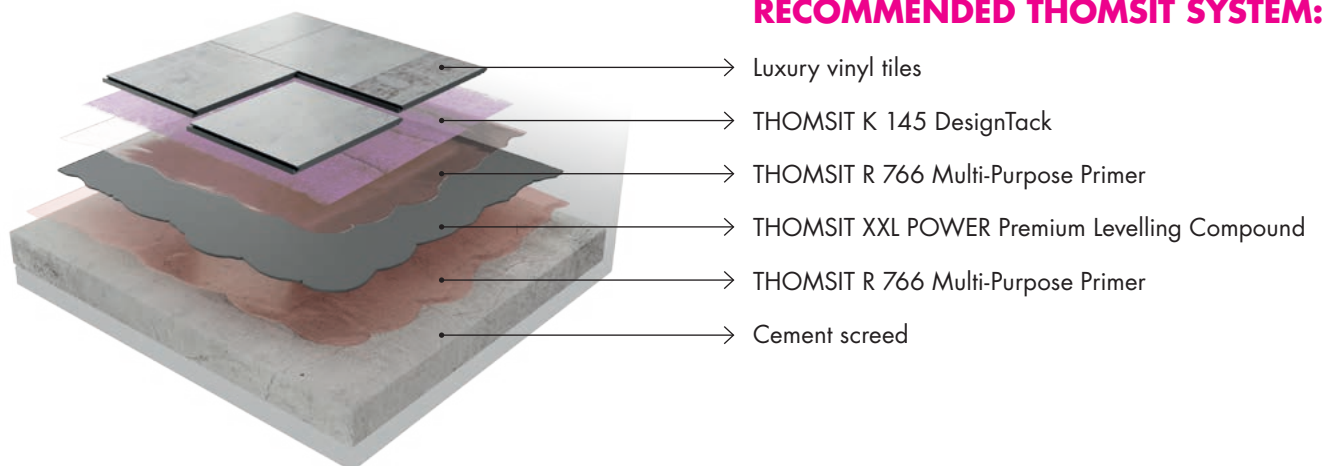

## **THOMSIT DT 100 QUICK-LIFT® ADHESIVE MEMBRANE**

- **Quick renovation without drying time, dust and noise**
- **Residue-free removal of the flooring material**
- **For use with dimensionally stable flooring**

# REMOVABLE FIXING

## ERGONOMIC APPLICATION

With this bonding method, the adhesive is comfortably applied by roller from a standing position. At a later date, the flooring material can be easily removed again. Our special roll-on adhesive **THOMSIT K 145 DesignTack** can also be used as an anti-skid tackifier under loose-lay flooring elements or under click luxury vinyl tiles. And: When working under deadline pressure, you're always on the safe side with our roll-on adhesive.

## THOMSIT K 145 DESIGNTACK

- **Reliable fixing of luxury vinyl tiles**
- **Ergonomic application by roller**
- **Low consumption**
- **Flooring elements can be easily replaced**

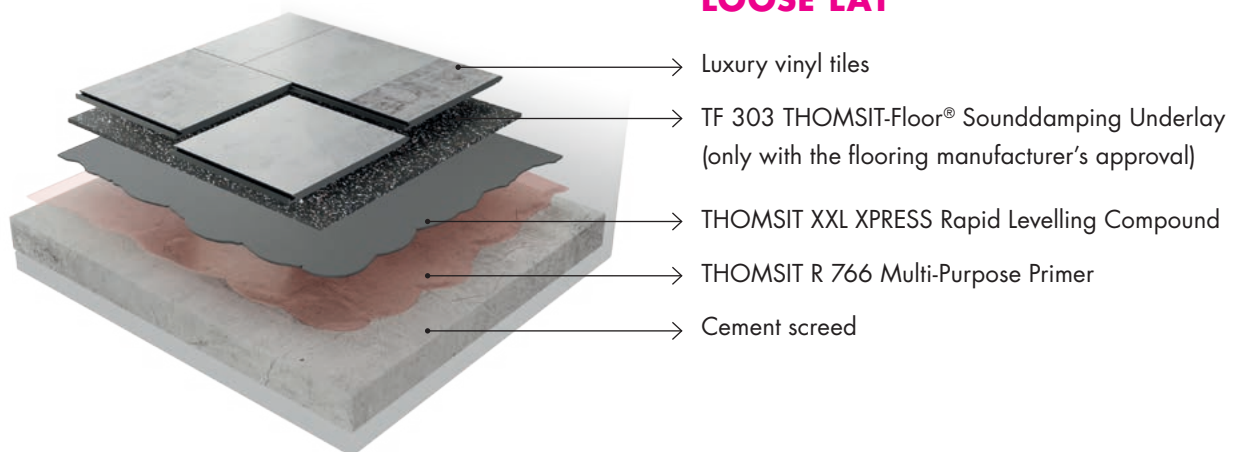

# LOOSE LAY AND SELF-ADHESIVE INSTALLATION

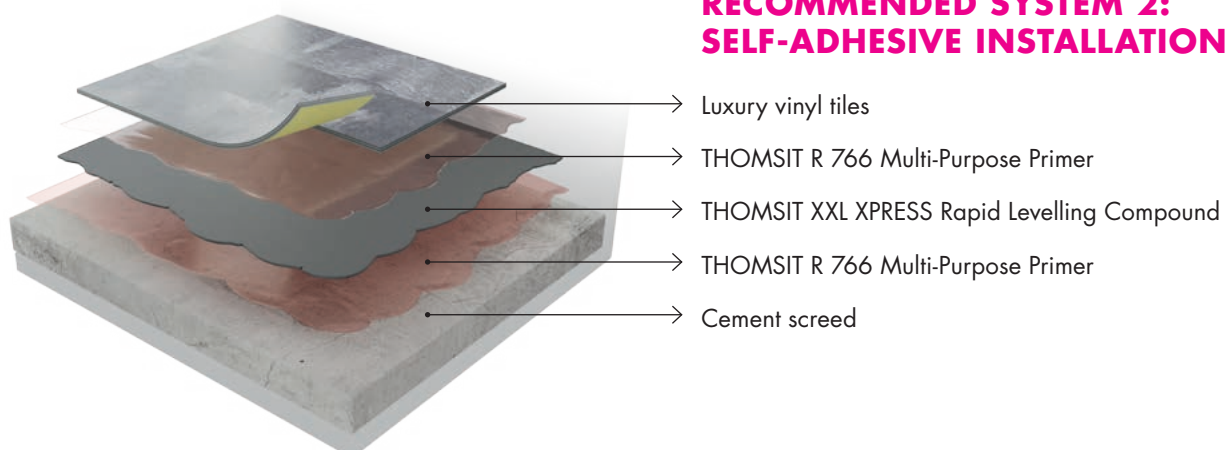

## QUICK - WITHOUT EXTRA ADHESIVE

A high level of craftsmanship is also needed for the loose lay of flooring and for the installation of self-adhesive materials. In both cases, a perfectly even substrate is required. One advantage of both installation methods is their speed. This strength can be fully exploited when also speeding up the substrate preparation time. This is where our extremely fast-drying **THOMSIT R 766 Multi-Purpose Primer** and our rapid levelling compound **THOMSIT XXL XPRESS** come into play. Then there's nothing to stop rapid progress on site.

### RECOMMENDED SYSTEM 1: LOOSE LAY

### RECOMMENDED SYSTEM 2: SELF-ADHESIVE INSTALLATION

# THOMSIT XXL XPRESS RAPID LEVELLING COMPOUND

- Ready to receive flooring after just 90 minutes
- Low-dust formulation for cleaner work
- Excellent flowability
- Very high strength (suitable for use under parquet)
- Ultra-smooth surface – facilitates adhesive application and reduces adhesive consumption
