ILA302
OCCIDENS DESERT

Pure textile motifs, so intricately crafted that they could virtually pass for wall-mounted textiles.

HUGO, ROCCO, GIGI and **PABLO** are all reminiscent of other well-known textile patterns, such as herringbone and pied-de-poule, only brought up to date with colour and finished with a nice touch.

PABLO DESERT

The collection Aquila combines Southern charm with elegant fashion.

From citrus and cypress trees to warm, geometric fabric designs, from vibrant colour combinations to warm tone-on-tone wallpaper patterns.

Taking inspiration from Southern towns and villages, we have embellished the designs with touches of textile.

This look is the common thread throughout the entire collection, giving you the sensation of being surrounded by fabrics rather than wallpaper.

This is precisely what gives the collection its rather unique touch.

The herringbone pattern also features on our **OCCIDENS** design. Complemented with simple geometric shapes, it manages to seamlessly combine modern and vintage.

SOBBORGO invites you into charming Southern villages surrounded by nature. This hand-drawn landscape has been painted in a deliberately abstract manner, resulting in a breath-taking overall look.

ARC IVY

Our **ARC** wallpaper takes inspiration from the beautiful Sobborgo landscape. Houses and trees are treated as abstract subjects, morphed into simple shapes whose endless colour combinations make for an intricate overall composition.

DGILA101x PATINA SPICE

Taking an abstract approach further is our **PATINA** design, depicting a complex array of colourful patches. Enlarging the design produces a beautiful, monumental result.

Derived from our Arc wallpaper, **MANZONI** fills in the shapes with an intricate stripe pattern.

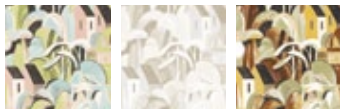

These have been specially machined to create an added embossed effect.

With its tone-on-tone colour scheme, Manzoni gives off a soft geometric character.
