**Modular Processing Line:**

**Bausch Advanced Technology Group** includes companies located in Germany, USA, Brazil and Switzerland and also benefits from a large distribution network covering many countries worldwide. The group combines an extensive experience of over 40 years of engineering and manufacturing of machinery dedicated to the pharmaceutical and biotech industry. It offers complete primary packaging lines for syringes, cartridges, vials, bottles, ampoules, bags and various other containers starting at small tabletop units for small batches up to high speed, fully automatic production lines. Following equipment can be offered and customized to our customer's special requirements:

- Washing Machines
- Depyrogeneration Tunnels
- Filling and Closing Machines
- Labeling Machines
- Plunger Rod & Backstop Insertion
- Tray Loaders
- Nesters / De-nesters
- Safety Device Assembly
- Bag Making Machines
- Laminar Flow Units

A strong relationship to clients is very important for creating innovative new products. Therefore each BATG location was chosen to be geographically close to our customers, to offer the greatest level of service and support they require.

To support our customers at any time and any location, we have built a worldwide network of experienced and well trained service teams able to provide local service. Our services include consulting, installation, spare and wear parts, upgrades, machine accessories such as pumps and needles, repair and maintenance of Bausch Advanced Technology Group machines as well as machines from other manufacturers.
