Mfg. Area

Anish Granulation Line

1 L to 2500 L scalable range

High yield and less product loss due to closed transfer by dust free charging and discharging

Through-the-wall & Stand-alone installation options

Independent operating interface with integrated PC controls for automated processes and short set-up times

Convertible combo processor: Drying, Top spray & Bottom spray options

IPC Bin Lifter, Tipper & Multi-Purpose Column options for product charging & discharging

Wet & Dry Co-Mills, Vibratory & Rotary Sifter options

Octagonal, Double-Cone & Conta-Piller Blender options

Anish Mixer Granulator

1 L to 2500 L complete scalable range

Dust free charging by vacuum
& air purged degassing filter

Advanced mechanical seals
with air purging arrangement

Jacketed bowl option for
hot melt granulation

Inline under-driven & over-driven
co-mill at discharge

Direct & belt driven
impeller technology

Binder addition with spray nozzle
& peristaltic pump

Through-the-wall &
Stand-alone design options

GAMP 5
Category 4 Compliant

Anish Extruder & Spheroniser

Extruder

Output range from
0.5 kg/hr to 400 kg/hr

Single & twin screw extruder options

Easily convertible in
Dome / Radial / Axial extruder

Jacketed design for heating
& cooling provision

Spheroniser

Available in disc diameter
200 mm to 900 mm

Chequered plate options
from 1 mm to 8 mm pitch

Plate lifting mechanism with
bucket for easy dismantling

Jacketed design for heating & cooling

GAMP 5
Category 4 Compliant

Anish Fluid Bed

AFB - C

ATSG - C

APCG - C

Drying

Top Spray

Bottom Spray

Tangential Spray

1 L to 2500 L complete scalable range

Cylindrical & conical expansion chamber design options

Convertible combo processor:
Drying, Top spray, Bottom spray
and Roto granulator options

Single shaking & twin shaking
filter bag and air purge socks
& bonnet filter options

Top spray granulation - 1, 3, 6 & 9 head spray
nozzles. Bottom spray coating - Standard,
high speed & light design spray nozzles.

Precise dew point control
(up to -40°C) to process
moisture sensitive products

Through-the-wall &
Stand-alone design options

Product charging and discharging
by vacuum transfer and tipper options

Anish Liquid Manufacturing Plant

10L to 10000L scalable range

Inline, inbuilt top & inbuilt bottom type emulsifier options

Total process plant including premix, active phase mixing and liquid manufacturing technology

Load cell for precise weighing

Top entry & Bottom entry stirrer options

Completely automated process with vacuum product transfer

GAMP 5
Category 4 Compliant

Anish Ointment Manufacturing Plant

10L to 5000L scalable range

Inline or inbuilt type of high shear emulsifier options

Total process plant including premix, active phase mixing and ointment manufacturing technology

Load cell for precise weighing

Top entry & Bottom entry anchor options

Completely automated process with vacuum product transfer

GAMP 5
Category 4 Compliant
